STONES

ORGANIC

PRODUCTS

We bring the nature to your home.

Aydin Kum is the parent company of Aydin Group of companies based in Turgutlu, Manisa, Turkey.

Aydin Group has rooted in the decorative natural stone, sand, and organic landscape products sectors with first-hand field experience since 1965 's.

Tumbled Stones, Pebbles and Gravels, Rocks, Columns, Boulders, Chippings, and Quartz Sands are our main products. Besides, special design products like stone sculptures, rock fountains, flower pots are all available in our product range.

Especially, our brand FLOURAY has gained market recognition by a rich selection of natural stones over the years. Each year we supply tons of products to our customers and stand with them in big projects.

We serve all over Turkey and export to seven continents in the world.

The whole processing activities and stages are actualized in our own factory with noticeable capacity and knowledge. We work with a high number of stone quarries from many years. Working directly with the quarries allows us to have complete control over quality and consistency. We design our raw materials and purchase according to customer 's demands and actualize production stage with an open communication. Therefore, we are able to cultivate long term relations with respectful companies over the world. This is our desired value and the main priority.

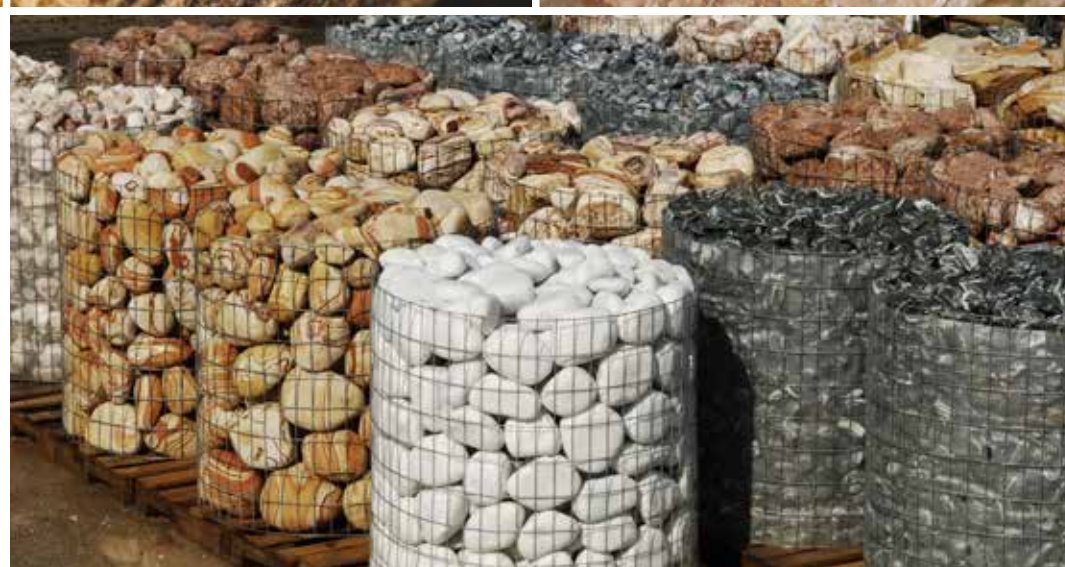

Our factory is located in the Aegean Region, where is the richest part of Turkey in natural stone resources and reserve variation. The abundance of raw materials, color-pattern variety, and ease of transportation are the most satisfying advantages for stone importers. Being close to a few ports provides more shipment choices to our buyers and facilitate their logistic arrangements. Thus, our strategic location is a benefit for common time management.

To sum up, we offer you a variety of Turkish natural stones with comparative advantages. However, our reserve knowledge and dependability are still our main strengths.

Your questions are welcome for further information.

We love to hear from you.
