# DOG CHEW STICK MADE OF COFFEE TREE WOOD.

## THE NATURAL DESIRE TO CHEW.

THIS **NATURAL** CHEW KEEPS DOGS ENTERTAINED  
AND MAINTAINS THEIR DENTAL HEALTH. MADE FROM  
THE **CAFFEINE-FREE** WOOD OF THE COFFEE TREE, THIS  
**VEGAN** STICK IS BOTH **SUSTAINABLE** AND **ECOLOGICAL**.

## CANOPHERA

# LIFECYCLE OF CANOPHERA CHEW STICKS.

## 1 WHEN GIVEN TO YOUR COMPANION.

All fresh and new: CANOPHERA's natural chew stick is ready for your four-legged friend.

## 2 AT PEAK CHEW TIME.

CANOPHERA keeps your dog busy while stressed or at rest. While chewing, the stick flakes away, releasing tiny fibers of wood that also clean your dog's teeth.

## 3 AT THE END OF ITS PRIME.

By this stage, your dog has spent a lot of time with our natural chew stick.

## 4 TIME FOR AN EXCHANGE.

Once the stick is small enough to swallow whole, replace it with a new one. The amount of time it takes to reach this point will depend on the strength and vigor of your dog's chewing.

USE ONLY UNDER SUPERVISION.

SMALL WOOD DEBRIS ARE NORMAL.

NOT SUITABLE FOR PUPPIES.

FINE CRACKS IN THE WOOD ARE FINE.

REMOVE IF LARGER SPLINTERS BREAK OFF.

DISCARD IF CRACKED IN HALF.

DO NOT STORE IN COLD SURROUNDINGS.

# WE CARE ABOUT DOGS:

## FREQUENTLY ASKED QUESTIONS REGARDING THE CANOPHERA CHEW STICK FOR DOGS.

### 1 WHAT IS SPECIAL ABOUT CANOPHERA'S CHEWS?

- 100 % natural and untreated
- No animal or artificial ingredients and zero additives
- Suitable for dogs with allergies
- Zero calories
- Caffeine free
- Handmade in a sustainable and fair manner
- Very sturdy and long-lasting

### 2 WHAT IS COFFEE TREE WOOD?

Wood from the coffee plant, *Coffea canephora*, is commonly called coffee tree wood. This caffeine-free wood is a byproduct of coffee farming, making it a sustainable product. It is a hard wood due to the extremely tight bond of its fibers, making it significantly harder and heavier than the wood from our native forests. This also makes it perfect for chewing!

### 3 DOES COFFEE TREE WOOD SPLINTER?

During the normal process of chewing, fine wood fibers are released by your dog's saliva. These are harmless and can be digested without a problem. However, as with any wood, splintering can occur, especially for dogs with really strong bites or vigorous chewing habits. If splintering does occur, take the chew away from your dog. While suitable for most dogs, CANOPHERA chews might not be the right chew for every dog.

### 4 HOW LONG DOES THE CANOPHERA NATURAL DOG CHEW STICK LAST?

Depending on your dog's eagerness to chew and the strength of its jaw, the chew stick can last several weeks. Chewing the stick and wearing it down is all part of the enjoyment your dog gets from our product, giving them a sense of achievement. What matters most is choosing the right size based on their weight and chewing habits.

### 5 WHY IS OUR PRODUCT MADE IN VIETNAM?

Coffee can only grow in certain climates. Vietnam is the world's second largest producer of coffee. By buying the wood byproduct, CANOPHERA is being sustainable with its sourcing and supporting local farmers in Vietnam. This allows farmers to generate additional income and learn new skills.
