

From Clinical Expertise and Cat Ownership
to Global Innovation

www.cattuspet.com.br

Cattus was born from the dissatisfaction of a veterinarian and cat owner who personally experienced the limitations of the market.

Faced with inefficient products, high costs, and solutions based on non-sustainable raw materials, he decided to create what he could not find: a definitive solution to the greatest challenges faced by cat households — **UNPLEASANT ODOR AND WASTE DISPOSAL**

A Journey of Success and Innovation

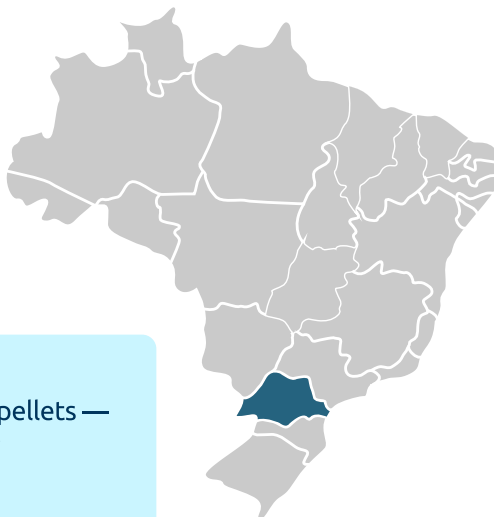

We are more than a manufacturer — we are an established pet technology startup. Our path to maturity includes:

- **Innovation Ecosystems:**
Strategic participation in three of Brazil's leading acceleration and innovation programs.
- **Acceleration Phase:**
Currently in full expansion, with validated operations and high customer satisfaction rates.
- **Proven Market Approval:**
Excellent feedback from both B2B partners and end consumers seeking performance and well-being.

The Heart of Our Production: Paraná, Brazil

Cattus is strategically located in the state of Paraná, a Brazilian region recognized for producing some of the world's highest-quality renewable cat litter substrates.

- **Raw Material Expertise:**
Specialists in processing corn, cassava, and pine wood pellets — premium raw materials for high-performance cat litter substrates.
- **Proprietary Portfolio:**
We already operate three proprietary high-performance plant-based litter brands.
- **White Label Projects:**
We offer our expertise and manufacturing infrastructure to develop private label (White Label) projects for international partners seeking premium quality and sustainability.
