

XMK (Guangdong) Refrigeration Technology Co., Ltd. is a modern, high-tech enterprise integrating research and development, independent innovation, production, and sales of refrigeration equipment. The company is dedicated to manufacturing high-quality refrigeration units, air coolers (evaporators), fin-and-tube condensers, and mobile containers, which are widely used in hotels, restaurants, supermarkets, the food service industry, the health and hygiene industry, the pharmaceutical industry, and the agricultural industry. The company holds numerous national invention patents and over 30 utility model patents, and has achieved industry certifications such as ISO90001:2015, SGS, RoHS, FC, and European CE. The company occupies over 48,000 square meters and boasts modern production lines and processing equipment. It employs over 200 employees, including over 30+ technical personnel. Our products are highly sought after by both new and existing customers, both domestically and internationally. XMK GROUP currently sells its products to over 140 countries and regions worldwide. XMK GROUP is a global partner 30+ and has become a renowned brand in the global refrigeration equipment industry.

Our factory has been recognized by the Guangdong Provincial Department of Science and Technology as a "National High-tech Enterprise," a "Specialized, Advanced, and Innovative Small and Medium-sized Enterprise," and a "Guangdong Province Famous and Excellent High-tech Product." Its exceptional technological R&D capabilities have earned it widespread recognition. The "XMK" trademark has been recognized by industry authorities as a "Star Brand," "Leading Brand," and "Most Popular Brand," among other honors.

Our factory aims to become a leader in China's refrigeration and freezing industry and a global leader in refrigeration. Adhering to a people-oriented and quality-first management philosophy, the company is committed to forging ahead with innovation and striving to become China's most modern and largest refrigeration equipment manufacturer.
