Partner For Foundries"**

Doğuş Machine: Provides fast and innovative solutions for your foundry

Founded in 1998, Doğuş Döküm Malzemeleri A.Ş. has been providing a top quality service and products in Turkish foundry business with a new perspective. Doğuş Döküm Malzemeleri A.Ş. has been supplying foundry auxiliary materials to the Turkish Foundry Industry for nearly 30 years. Dogus Machine as a subbrand of Doğuş Döküm Malzemeleri A.Ş. has been producing innovative machinery and equipment in the non-ferrous metal production sector for nearly 20 years and has managed to become a leading company in the sector by combining the research and development infrastructure, manufacturing experience and trained manpower it has gained during this time. Since then Dogus Machine together with expert staff, presents the most suitable solutions within the frame of international quality standards and environmental perspective to over 1.000 customers in Turkey and in more than 17 export countries.

Main goal of Dogus Machine is to find the most suitable solution for customers by defining their needs. By following the latest technology and developments closely, Dogus Machine produce special machines and production lines for

the needs of its customers. Dogus Machine provides innovative and reliable machines for customers, with competence and know-how of its staff. Dogus Machine products can be used easily, and practically in high capacity industrial organizations as well as in a small workshops and even in research laboratories to produce small, precise prototypes. Dogus Machine offers the customers most productive, qualified and economical solutions. One of the most important characteristics of Dogus Machine is that it can realize the mechanical, electrical and automation-software parts of all machines and systems within its own structure.

In addition, Dogus Machine has carried out KOSGEB and TÜBİTAK R&D projects over the past 20 years. Dogus Machine also has an R&D Office within Kırıkkale University Technopark, where it carries out R&D and design development studies.

Dogus Machine has taken an important role in quality in the non-ferrous casting industry with the Vacuum Density Tester developed 10 years ago as a result of R&D studies and produced with its own patent. Vacuum Density Testers produced by Dogus Machine can make measurements in all foundry conditions without being affected by the environmental conditions, with their closed-circuit operation feature. Vacuum Density Testers, currently produced in 4 different models, are used in more than 100 foundries.

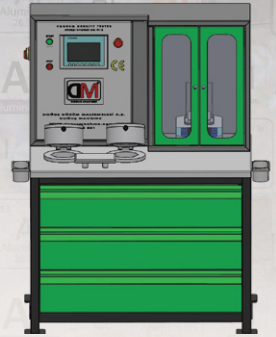

Dogus Machine has also developed a full automatic degassing machine for the first time to remove unwanted gases from Copper and Copper alloys before casting. With this degassing machine for which it has a patent, Dogus Machine has closed an important gap in the production of quality products in the copper production sector.

Dogus Machine gives every kind of technical and technological support for machinery market. Dogus Machine is committed to building long-lasting and stable relationships with customers and delivering superior customer pre-sales and after-sales technical support that positively impact their business. Together with its expert engineers, Dogus Machine is at its customers service all time.

Quality and accuracy have the major importance in Dogus Machine since beginning. Dogus Machine has ISO 9001:2015 certification, an internationally recognised standard that ensures services meet the needs of customers through an effective quality management system. All Dogus Machine products also have CE certification. Dedication to producing high quality products for our customers has been the major policy of Dogus Machine from the first machine to the last one.

CMS Wheel, Maxis Wheels, Döktaş, Cevher Wheel, Nemak, Rusal, Borbet, Mahle, Federal Mogul, Roketsan, Silca South Africa (Pty) Ltd, Kırpart, Assan Alüminyum, Çelikel, Tirsan and Kanca are some of Dogus Machine references. You can contact Dogus Machine for further references.

Dogus Machine takes the saying "if you can imagine it, then we can produce it for you!" as company policy. Thanks to the economical solutions gained by machines and providing a technical service 7/24, Dogus Machine has become a reliable and most demanded brand in a short time.
