Secure your AI. Patch your apps.

Two products. One goal: keep your AI and your company IT secure.

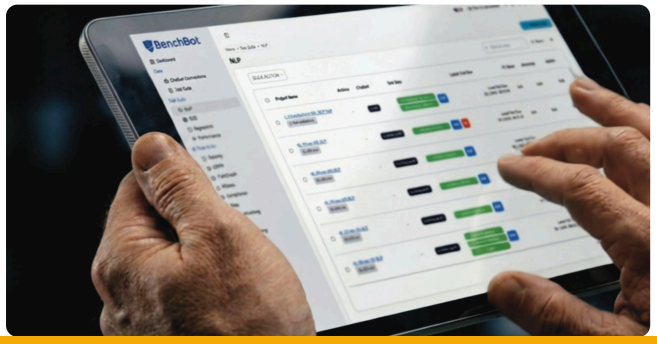

xyndata s.r.o. was founded in 2016 in Prague, Czech Republic. We build software that keeps AI and company IT secure: BenchBot tests AI chatbots before attackers do, and AutoPackager keeps Windows applications up to date through Microsoft Intune.

AI security testing

BenchBot

Security and quality testing for AI chatbots, voicebots and LLM applications.

- More than 150 automated security tests
- Tests for prompt injection, jailbreaks and data leakage
- Reports for GDPR, NIST AI RMF and ISO/IEC 42001 audits

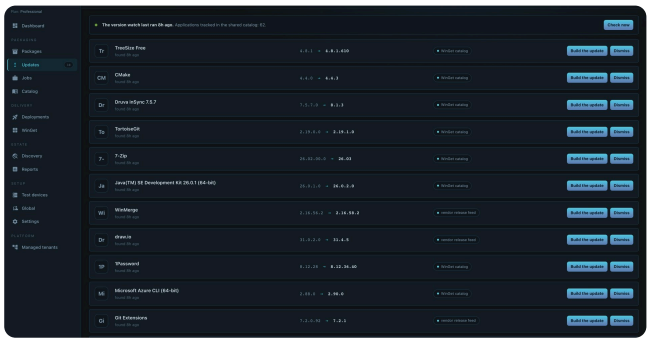

Intune application packaging

AutoPackager

Your Intune packaging pipeline, on autopilot.

- Native Microsoft Intune integration
- MSI and EXE installers packaged automatically
- Deployment rings with automatic rollback

BenchBot

AI security testing

Security testing
Red-teaming, prompt injection and jailbreak tests

Data leakage and misuse
Find answers that expose personal data or break your rules

Compliance evidence
Reports for GDPR, NIST AI RMF and ISO/IEC 42001 audits

Quality and fact checking
Check answers for accuracy and invented facts

Performance
Load tests and response times under real traffic

Voicebot testing
Test voice assistants from start to end

More at `benchbot.ai`

AutoPackager

Intune application packaging

Automated packaging
MSI and EXE installers packaged for Microsoft Intune

Deployment rings
Roll out to a pilot group first, then promote automatically

Automatic rollback
Return to the previous version when a rollout fails

Update detection
See which applications are outdated or at end of life

Known CVE fixes
See which new version fixes a known CVE

Driver updates
Driver catalogs for Dell and Lenovo devices
