## About us

At Dogs Like Fish we are a team who share a deep passion for our own pets and their health. Therefore what better way than to make our own treats and share them with our furry friends around the world.

We specialize in fish-based treats where we combine Iceland's rich fishing tradition with our love for pets to offer products that are healthy, sustainably sourced and delicious. Our goal is simple: give dogs and cats everywhere the nutrition they deserve, while keeping all additives away.

We produce high-quality pet treats under our own brand as well as in bulk and we also offer private label services, allowing pet stores and retailers to expand their product lines with custom branded, reliable, and affordable options that their customers can trust.

In the loving memory  
of our bestest boy  
Charlie 2012-2025

## Our facilities

We are based in Tukums, Latvia – a charming small town of around 16,000 residents, conveniently located just a short drive from the capital Riga.

In April 2026 we took a significant step forward by acquiring a modern 1,200 m<sup>2</sup> production facility. This new factory has dramatically increased our manufacturing capacity, and enabled us to implement even stricter quality-control standards. As a result, we are now able to scale production efficiently while continuing to deliver the same premium quality our customers have come to expect.

Our raw materials come exclusively from the North Atlantic and the Baltic Sea. We work directly with trusted suppliers in Iceland, Norway, Estonia, and Latvia, ensuring every batch of fish is wild-caught using sustainable fishing practices.

At the heart of our company is a passionate team of professionals who genuinely love what we do.

We currently serve retailers, distributors, wholesalers, and online platforms in the United Kingdom, Germany, France, Belgium, the Netherlands, Spain, Italy, Ukraine, Latvia, Estonia, Lithuania, Switzerland, and Canada.

Our mission is simple yet ambitious: to offer pet owners the highest quality, transparently sourced fish treats while growing responsibly and sustainably.
