

Item number: 6060euBE

Article name: TSP Recycled Poop Bags (8 small rolls, 120 bags without handles)

The 5 top facts

- Manufactured in the EU
- Certified with the Blue Angel
- Made from at least 80 % post-consumer waste (PE) - significantly lower CO₂ emissions than fresh PE made from new granulate
- Excellent handling: easy removal of stickers, excellent tear-off perforation, pleasant feel
- Safe to use: leak-proof, stretchy and tear-resistant

Made in EU

Our recycled poop bags in small roll format are made from at least 80 % post-consumer waste (PE) in the EU. We have worked for years to be able to manufacture this product in Europe. A machine was set up especially for this purpose, which is used exclusively for our production. After hundreds of hours of work, co-operation with various partners and 47 tested material mixtures, we are now proud of the solution we have achieved.

Certification - Blue Angel

These recycled dog waste bags are certified with the Blue Angel. They fulfil the strict requirements of the 'DE-UZ 30a' award criteria. This allows them to bear the internationally recognised and one of the most demanding environmental labels in the world. The Blue Angel, which has been the German government's eco-label for over 45 years, provides guidance when shopping and identifies products that are more eco-friendly than other products of the same use.

At least 80 % post-consumer waste (PE)

These dog waste bags consist of at least 80 % post-consumer recycle (PE), i.e. plastic that has already been used, including plastic packaging from household recycling collections. This conserves resources, as no new crude oil has to be extracted for the starting material and because significantly less CO₂ is produced when recycling PE compared to the production of new granulate. The bags are produced in the same film thickness (15 micrometres) as conventional bags made from virgin pellets, which is remarkable given the difficulty of processing post-consumer recycle. In this way, we avoid unnecessary material waste and conserve valuable resources.

Quality and handling

Our recycled poop bags not only impress with their eco-friendly design, but also with their outstanding quality:

- Excellent handling: the sticker is easy to remove and the excellent tear-off perforation makes it effortless to separate the bags from the roll. The feel of the film is pleasant.
- Safe to use: With a thickness of 15 micrometres, the bags are leak-proof, stretchy and tear-resistant.
- Space-saving: The bags are wound tightly on the roll and fit into almost any jacket pocket and many dispensers.

Packaging from sustainable forestry

The packaging (boxes) used for our recycled poop bags are all made from FSC-certified material. The core of the roll and the sticker that holds the small rolls together are made of cardboard or paper.

Correct disposal

Poop bags - regardless of the material - should always be disposed of in accordance with local disposal regulations. As a rule, they belong in the residual waste for thermal utilisation due to possible pathogens in the dog faeces. As long as it is ensured that the dog faeces bags are disposed of correctly (in the residual waste), recycled PE is a sensible material from an ecological point of view - at least as long as fossil raw materials (e.g. crude oil) are used to generate energy. This is due to the fact that PE burns residue-free to carbon dioxide and water during waste incineration and a lot of energy can be recovered in the process due to PE's high heating value.

Brief description of the product and the USP

- Manufactured in the EU
- Certified with the Blue Angel
- Made from at least 80% post-consumer waste (PE)
- Significantly lower CO₂ emissions during production than virgin PE from new granulate
- High heating value and clean incineration of PE in the waste incineration plant
- Leak-proof and tear-resistant
- Easy removal of the stickers, excellent tear-off perforation, pleasant feel
- Tight winding of the bags on the roll and thus space-saving
- Strong (15 micrometres) and large (23 x 33 cm)
- Easy and safe disposal of dog faeces
- Practical rolls fit in almost any jacket pocket and in many dispensers
- Packaging (box) made of 'FSC' certified material
- Inexpensive alternative to our biodegradable dog faeces bags
