

IMPROVING
YOUR AIR QUALITY

COMPANY

THE MILD CLIMATE AROUND MAGNIFICENT LAKE GARDA PROVIDES A HAPPIER,
MORE PRODUCTIVE WORKING ENVIRONMENT.

DO THE JOB WELL PAY ATTENTION TO DETAILS THINK BIG

Not just slogans: these words have been motivating us since 1976. They are strong beliefs that have guided our strategies and our drive to adopt a whole new approach to production. Fulfilling this aim, our plant now features state-of-the-art automation and process robotics. An approach where our priorities are:

- OPERATOR SAFETY
- CONSTANT PRODUCT QUALITY
- OPTIMISATION OF THE PRODUCTION CYCLE
- FLEXIBILITY OF MODELS

The novelty and value of our guiding principles have been confirmed many times over by our customers' approval, the certifying bodies and, above all, the domestic and international markets. Principles we intend to carry into the future.
