COMPANY IDEAS TO CREATE.

Opera Company

Together with our customers, we contribute to the success and continuous improvement of the community of the fenestration

As a strategic partner with lasting experience and users spread all over the world, we love to get involved in client projects to fully understand the vision in order to adapt our solutions in an efficient and timely manner.

Our products

Job Management

A complete and versatile solution for the inspection of every phase of the production of fixtures in aluminum, PVC and wood- aluminum. Easy to use, it can be connected to all machinery.

Account Management

The simple tool designed to speed up the issuance of billing and transport documents. It is connected with Opera Job Order Management for importing data.

Cutting Assistant

The assistant to the cutting station integrated in Opera Job Management that double checks the lists coming from the office, manages the parts off-cut and prints the customizable design labels with barcodes for the working center.

Info Point

Provides real time info directly to the production worker throughout the various construction phases. It also allows the CE sticker that is applied to the final product to be printed.

Opera CAM

The 3D CAD/CAM integrated in Opera Job Management, which has been designed to be installed on CNC machinery, allows the production process to be automated through a system of barcodes

Orchestra

Online estimate portal integrated with Opera Job Management
