05025-TAN

LIGHT FUNCTIONS

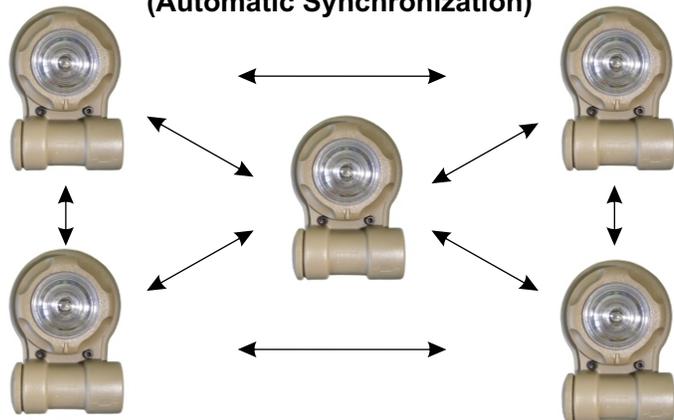

Features

- Compatible with both Hook/Loop and 3M Dual Lock™ Tape Fasteners
- Rounded shape to prevent snag hazard
- Rugged body, waterproof up to 330 feet and extremely resistant to impact
- Failsafe system separates Overt and Covert modes by reverse polarity program switching; completely prevents accidental overt activation
- Programmable IR signatures that can be user recorded with any white or IR high output light source
- AutoSync™ with identical models over ad hoc mesh network (programmable signatures not applicable)
- Positive feedback switch ring with raised switch position nub and vibrating feedback
- VIPIR has 16 years of combat proven experience

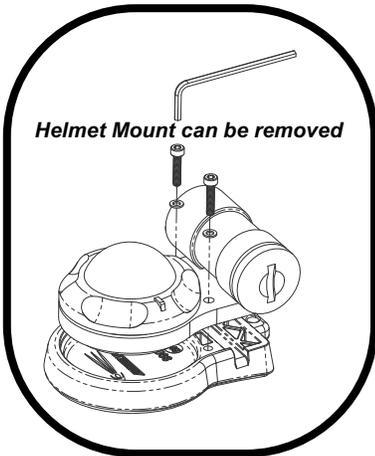

AutoSync™ (Automatic Synchronization)

Dual lock backing on helmet mount is compatible with dual lock and standard hook and loop fabric.

Our helmet mounted light can easily be moved from the helmet to our MOLLE compatible vest pouches (optional: order P/N: 99002).

Pouches are available in black, tan or OD green.
