After 3 months, our Betta Ms Nuggies seems to be thriving on this food and her colors are more brilliant. She's also had **awesome fin growth.** Small enough pellets that usually stay on top of the water. I'd definitely recommend.

Paulline
 ★★★★★

My Calico has the **most spectacular colors, and has become extra vibrant.** We have been using this food for a few weeks, and I am planning on repurchasing once it runs out. I also love that the container is flip top and comes with a spoon!

Bonny
 ★★★★★

I was a little worried with pelleted feed because of bloating and developing intestinal issues, but he has been accidentally fed by my four kiddos more times than I can count and **despite the influx of feed has had no issues.** Can't recommend this feed enough.

Dorothy
 ★★★★★

I have one goldfish that somehow won't grow unlike the big ones I have. I'm assuming it's because the size of the sinking pellet is too big for her or him. So I got these for variety, and for the **100% organic quality** of it. My fishies love them!

Virginia
 ★★★★★

Our fish love it. Food doesn't stay on top of water, it **drops down slowly, makes it easy for the fish to collect it** as it falls down.

Geoffrey
 ★★★★★

My betta really loves these. I like these more than the other pellets I was giving him. These are **smaller and easier,** it seems, for him to eat. Great product.
