FENCE STRIPS

WDB PLAST® fence strip with double protection system DUALTECH is an innovative solution, through which you can create the tasteful, unique and functional fencing system.

WDB PLAST® fence strips are manufactured based on DUALTECH system, what guarantees increased UV radiation protection, low temperatures resilience and prevent discoloration.

Fence strips create sense of privacy, stop gusts of wind, protect against wind blown dust, leaves or snow.

Our strips are made from high quality synthetic materials resistant to UV degradation, so that they do not lose their original colour.

ADVANTAGES OF USING FENCE STRIPS

- ✓ privacy protection
 - strips provide sense of privacy on your property, terrace or balcony,
- ✓ snow and wind protection
 - strips reduce strong gusts of wind and overblow of snow,
- ✓ noise reduction
 - strips limit the noise level at the places with high sound concentration (nearby busy street, playgrounds or construction site).

DUALTECH SYSTEM

System DUALTECH is used in the production of the original WDB PLAST® strips and it is an innovative solution guaranteeing the highest quality of product.

System DUALTECH consists two protections:

1. UV STABILIZER – prevents premature material degradation and extends the service life of WDB PLAST® strips;

2. COLOUR PROTECT – prevent from fading and keeps the original colour of the strips.

Put on proven solution!

WDB PLAST® FENCE STRIP ASSETS

- ✓ certified by TÜV SÜD Certification and Testing – test of discolouration with result 4,5/5,
- ✓ UV-stabilisation prevents prefading,
- ✓ does not deform under the influence of temperature,
- ✓ requires no maintenance,
- ✓ simple and intuitive mounting – no professional tools or knowledge needed,
- ✓ WDB PLAST® PREMIUM LINE strips are made of POLIPROPYLENE,
- ✓ WDB PLAST® strips are made in DUALTECH system.

By choosing WDB PLAST® fence strips you put on the highest quality guaranteed product!

STRIPS PARAMETERS

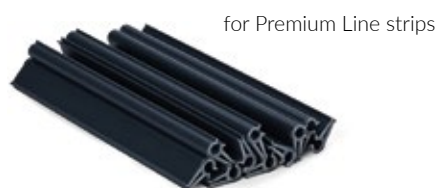

Size	190 mm				47,5 mm		
Product line	Premium Line 1,2 mm	Standard Line 1200 g	Basic Line 450 g	Basic Line 450 g	Premium Line 1,2 mm	Standard Line 1200 g	Basic Line 450 g

MOUNTING CLIPS FOR STRIPS

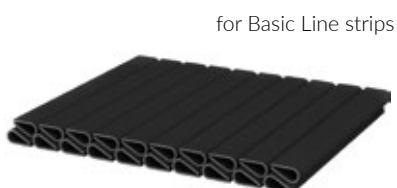

Fence strips are fitted to the fence with mounting clips.

WDB PLAST® clips attributes:

- ✓ a strong hold,
- ✓ fast and easy installation,
- ✓ resistance to UV radiation,
- ✓ available in colours: RAL 7016, RAL 7040, RAL 8011, RAL 9003, RAL 6005, RAL 9005.

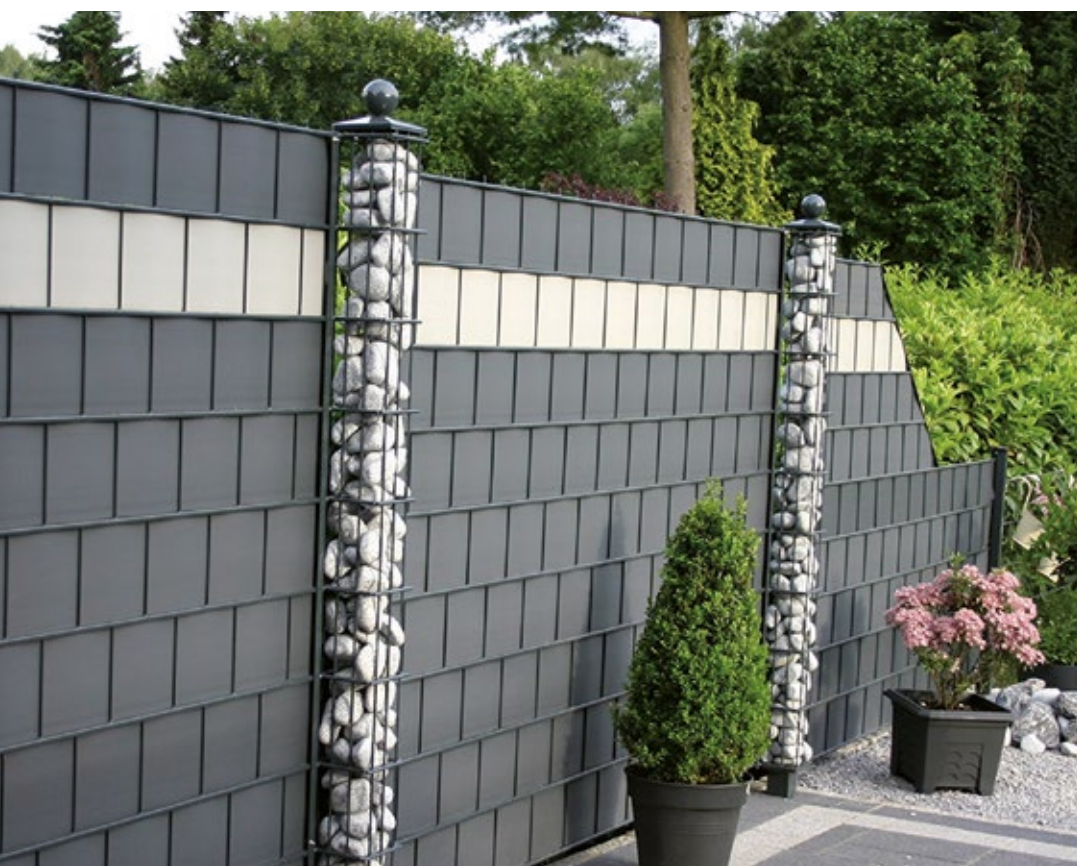

for Premium Line strips

for Basic Line strips

FENCE STRIPS INSTALLATION

1. Thread the tape through the fence panel rungs.
2. Lash the tape with mounting clip.
3. Anchor the fence tape with mounting clip to end of your fence panel.

BALCONY SCREENS

WDB PLAST® balcony screen dedicated to balustrades, is another solution providing a sense of privacy on balconies and terraces.

The balcony screen is made of high-quality material, moisture, heat and frost resistant, which makes it a product with longer service life and durability.

The balcony screen is a highly functional solution:

- ✓ covers balconies and terraces from neighbours or passers-by,
- ✓ blocks external pollution factors (like dust, leaves or snow),
- ✓ stops strong gusts of wind,
- ✓ provides shade,
- ✓ prevent from exceeding balustrade by animals.

LANDSCAPE EDGING

WDB PLAST® landscape edging give almost unlimited possibilities of planning, moduling and organising garden areas.

The usage of WDB PLAST® landscape edging allows to create original and unique garden layouts and arrangements, and at the same time organises space and surface. WDB PLAST® landscape edging fulfil its role also as a functional solution — can stably lash agro-textile, or any material used in gardening, to the ground.

Edges are made of flexible material, that allows to create any shapes and demarcation lines, and thanks to its resistance to weather conditions, chemical and mechanical factors, they ideally suit private gardens as well as public spaces.

WDB PLAST® landscape edging are made of high quality recycled material. The edges are environmentally friendly, and simultaneously solid and tough — are resistant to both high and low temperatures, chemicals and plant protection products.

WDB PLAST® landscape edging are easy to shorten and shaping with basic tools usage. They shall be lashed to the ground with dedicated WDB PLAST® mounting anchors. Anchors grammage and length allows to steadily affix the edge to almost any substrate. Various external forces can act on the edges, but WDB PLAST® mounting anchors withstand them effectively. This enables us to guarantee an increased life and stability of the construction.

WDB PLAST® landscape edging applications:

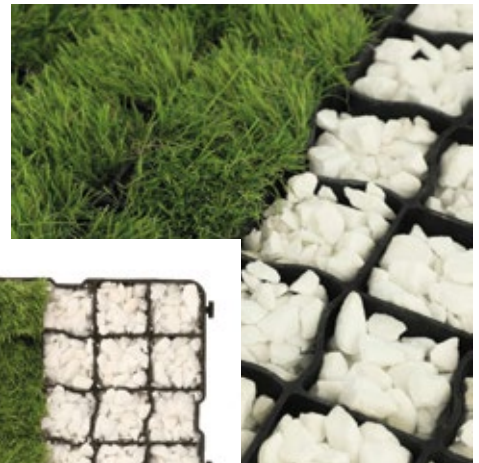

- ✓ lawn shaping,
- ✓ paths creation,
- ✓ flower and shrub beds creation,
- ✓ plant and gravel composition creation,
- ✓ patch shaping,
- ✓ making beds around the trees,
- ✓ separate areas with bark mulch, grit, etc.

LAWN GRID

The grass cells WDB PLAST® are the ideal solution for stiffening the substrate while maintaining the biologically active surface. The cells can be filled with both grass and gravel or decorative stone, in order to achieve both a highly functional and an esthetic way of fitting outdoor surfaces.

A scope of application of grass cells:

- ✓ roads and driveways,
- ✓ parking spaces and squares,
- ✓ lifting surfaces,
- ✓ hardening of slopes,
- ✓ strengthening of embankments.
