

Flexxta® Stretch Hood Series

Conquer every packaging challenge

Our innovative and sustainable Flexxta® stretch hoods effectively secure packaging of any type and size and reliably protect your goods from environmental influences, dust, dirt and moisture during packaging, transportation and storage. RKW's stretch hoods are applied without heat or naked flames. Customers benefit from lower energy costs and no risk of fire. It is also efficient to use, suitable for a variety of applications and industries, and conserves resources and the environment.

Excellent durability and flexibility with minimum 30% recycled content

Our sustainable Flexxta® stretch hoods are designed for exceptional durability and flexibility. Tailored to your specific application and business needs, they are available with a minimum of 30% recycled content and Recyclclass® certification or as mono-material options for optimal recyclability. Flexxta® stretch hoods provide superior protection during transport and storage, ensuring efficient use while conserving resources and minimizing environmental impact.

Key benefits

Outstanding performance:
high elasticity and retention forces,
dart impact, and tear resistance

Maximum transportation security
due to superior load stability

Outstanding product
protection

Available with minimum 30% recycled
content and Recyclclass® certification,
monomaterial (PE)-based upon request

Suitable for sharp-edged and/or
irregularly shaped goods

Excellent machinability on all stretch hood
lines (high throughput > saves energy)

Recyclable mono material

Up to 40% less weight per packaging
unit compared to heavy shrink films

Can be tailored to withstand
weather-changing and fluctuating
temperature environments

✓ Learn more about the portfolio

Flexxta®Titan

Explore outstanding durability and puncture resistance, ensuring your products are safeguarded with confidence.

Flexxta®Versa

Experience excellent flexibility that allows you to seamlessly package a variety of product sizes and shapes.

Flexxta®Atlas

Enjoy superior load stability, even in fluctuating temperatures, thanks to our advanced film technology.

Flexxta®Ecore

Embrace sustainability with our eco-friendly stretch hoods, made with minimum 30% recycled content, EVA free, Recyclclass® certification
