

About Sensvision

Founded in 2012, Sensvision is a high-tech enterprise specializing in the research, development, and manufacturing of outdoor imaging equipment. Our diverse portfolio includes popular products such as wildlife cameras, night vision scopes, telescope eyepiece cameras, and rangefinders.

Manufacturing Excellence

Our 18,000-square-meter facility, staffed by 400 employees and operating 24 production lines, ensures a robust monthly production capacity of 200,000 units. As a certified supplier to Fortune Global 500 companies, we adhere to the industry's most stringent quality-control standards.

Quality and Global Reach

All Sensvision products are manufactured under BSCI and ISO audited processes and comply with CE, RoHS, and FCC certifications. Through strong global partnerships, our brand Wiscouting has earned the trust of over 100,000 users across more than 60 countries.
