# Why secure your mobile fleet?

A mobile fleet, whether it's made up of **business** and/or **personal terminals, Android** and/or **iOS** is a gateway to your company's information system.

## Growing **threats** 📈

**Phishing**
In 34% of phishing attempts, mobile users click on the fraudulent link

**Intrusive applications**
61% of mobile applications collect user information

**Malware**
10% of mobiles encounter malware during their lifecycle

**Exploitation de l'OS**
81% of Android and iOS mobiles are running on obsolete and vulnerable versions

## Consequences of a **cyber attack**

- Data leakage
- Damage to image
- Service interoperability
- Financial penalty (CNIL and GDPR)
