Company Profile

History

Vorstellung des Unternehmens

Sustainability

Sustainability is a core value in our company. This is underlined by several aspects.

- PV system on the building roofs
- Ongoing decarbonization projects
- Investment in energy-saving technologies and operating resources
- Utilization of local synergies
- Anchoring the concept of sustainability in our strategy

Our core competencies

Using our modern machinery and integrated production processes, we manufacture parts weighing between 3 grams and 2 tons and measuring between 5 and 2,500 mm. Our expertise lies in machining processes such as turning, milling, grinding, sawing and many more.

We also offer complete processing of individual parts and assemblies, including assembly.

Our USP:

- High precision in large-scale series production
- Flexibility, future orientation, and innovative strength
- Motivated and innovative team supported by a family business culture
- Highest quality standards
- Authorization to re-stamp materials, certified by TÜV Süd

Business divisions

Defence

Serial supplier of mortar and artillery shell casings, e.g., of caliber 120, 122, 150

- Currently undergoing ballistic testing
- Member of various clusters
- NATO registration completed, NCAGE: CNK68
- ISO 27001 certification sought, completion by June 2026
- NIS 2 readiness by Q2 2026

Business divisions

Renewables

We are currently the only series supplier in Europe for electrolysis stack components – cell rings! Thanks to our proprietary cell ring production process, we have been able to reduce CO2 emissions during production by over 40%.

Other products: Components for PEM stacks

Awards: Research and development allowance 2024 + 2025
TOP 100 Innovator
EU Innovation Fund decision pending

Business divisions

Medical Components

We are a series supplier for various parts in the medical industry, supported by our process consistency.

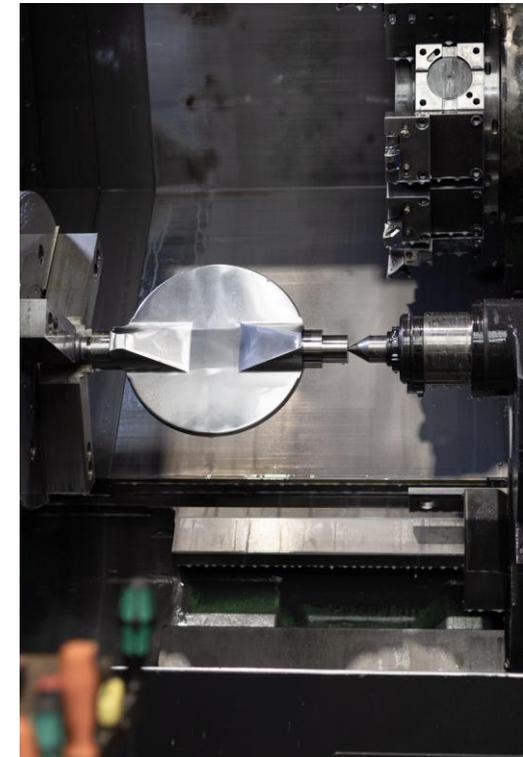

Examples:

- Bone Nails
- Complete knee joint with adapters and mounting
- Screws
- parts up to a diameter of 3 mm and a length of 1,5 mm

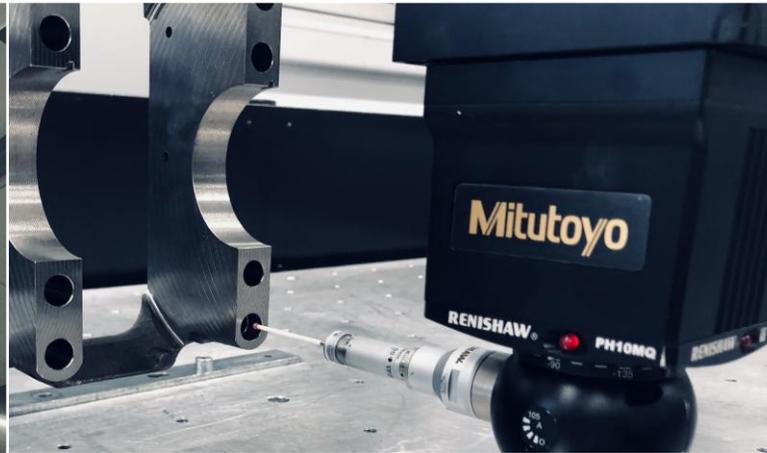

Business divisions

product portfolio

Our product portfolio includes: powertrain components, engine compartment components, steering and braking systems, transmissions, housings, rings, flanges, shafts, covers, valve plates, turbine wheels, cell rings, and much more.

Our quality assurance

We determine the specified quality requirements using our state-of-the-art quality assurance system in our air-conditioned measuring room.

We are supported in this by our tactile, image-processing, and scanning measuring systems, some of which include RPS processes.

Certifications

- ISO 9001, valid until November 2028
- ISO 27001 certification sought, completion by June 2026
- NIS 2 readiness by Q2 2026
