Why OPENVAS?

Vulnerability Management: Level up Your IT Security!

OPENVAS

The Danger:
Cyber attacks are no longer isolated incidents, but a daily reality.

The Situation:
Distributed IT environments, outdated systems and shadow IT open the floodgates to attackers. Firewall & Co. only react after the attack has already taken place.

The Problem:
While attackers have known for a long time where and how to strike, your own vulnerabilities often remain undiscovered.

The Solution:
OPENVAS SECURITY INTELLIGENCE continuously and automatically identifies vulnerabilities in your IT. So you can close your security gaps!

OPENVAS: The World's Leading Open Source Vulnerability Management!

Vulnerability management reduces the risk and impact of cyberattacks by up to 99%. Our solutions are available in the form of hardware, virtual appliances and in the cloud.

Benefits of OPENVAS SECURITY INTELLIGENCE:

- Best detection rate: Over 200,000 vulnerability tests
- Fastest protection against zero days: Usually available just one day after they become known
- The only provider of turnkey ready hardware appliances worldwide
- Made in Germany, therefore 100% GDPR compliant
- Over 15 years of cooperation with the BSI
- Audits and reports for compliance guidelines

Take Advantage of Our Services:

- In-house support in German and English
- Comprehensive training and webinars
- Proof of concept installations
- Support for sizing and technical questions
- On-site installation support on request
