

15+ Years Dedication To The Laser Measurement Industry

2010-2026
ALWAYS INNOVATING

SNDWAY founded in 2010, is a leading high-tech enterprise focused on advancing core laser measurement technologies, alongside product development and sales. Our product portfolio encompasses six major categories: Laser Distance Meters, Laser Distance Sensors, Laser Rangefinder Telescopes, Laser Levels, Non-destructive Testing Instruments, and Environmental Gas Detectors. These innovative solutions are widely used in engineering surveying, industrial automation, automotive testing, environmental monitoring, smart logistics, and construction.
