

Business Unit Electronics

Your Solution for
Customized
Electronic Systems

More Than Just Standard

Your E²MS Partner for Germany and Worldwide

Based in Eckental near Nuremberg, HEITEC is your experienced E²MS partner for electronics manufacturing, enclosure solutions, and 19-inch enclosures.

We support our customers worldwide and deliver solutions for international markets – from concept and prototyping to series production.

Our Services at a Glance:

- Comprehensive development of electronics, mechanics, and software
- System architecture, prototyping, and transition to series production
- Embedded programming & advanced FPGA design
- Project and obsolescence management for long-term product availability
- Customized solutions for industry, medical technology, and communications technology
- Broad portfolio of enclosures for standard or customized applications

Comprehensive Electronics Development

We support you from concept development through mechanical, electronic, and software engineering to series production.

Our experienced team ensures that all components are perfectly coordinated for optimal EMC performance, usability, and thermal management.

Attention to Detail in Electronics Manufacturing

Precision for Germany and the World

In our state-of-the-art electronics manufacturing facility, we produce assemblies, components, and complete systems in high-mix, low-volume – starting from batch size 1.

Our Manufacturing Expertise:

- SMD and selective soldering systems, extensive testing such as AOI, flying probe, or X-ray inspection, as well as rework at our in-house rework station
- Assemblies from 19-inch carrier boards to complex control boards
- In-house system assembly from individual modules to complete systems
- Cleanroom conditions for sensitive applications

Our processes are designed for reliability, traceability, and sustainability.

Protection Meets Design

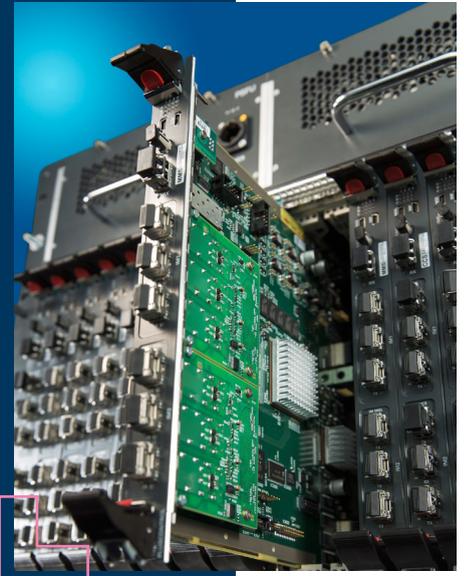

Customized Enclosure Solutions

HEITEC offers subrack, desktop, and system enclosures for standard applications up to complex system platforms.

Your Benefits at a Glance:

- Modular design, individually configurable
- Integrated EMC protection, climate control, and power supply
- Delivery of fully assembled, wired, and tested systems possible
- Customized plastic and metal components as well as 19-inch system solutions

With our enclosure solutions and 19-inch enclosures, we combine functionality, stability, and design for industrial applications worldwide.

HEITEC – Locally Rooted, Globally Connected

From Eckental near Nuremberg, we support our customers and implement projects for partners worldwide.

As your E²MS partner, we offer end-to-end support from development to series production, combined with the highest quality and innovative strength.
