- TECHNICAL RUBBER PRODUCTS

# elastomeri

## Production & renewal

of rubber, PU & steel rollers and rubber cylinders for woodworking machines

**High quality products, fast and reliable service.  
We sell all over the world.**

**all you need for  
woodworking industry**

## RUBBER AND PU ROLLERS OF ALL TYPES AND DIMENSIONS

- \* for power feeders (Holz-Her, Elu, Haffner, Maggi, Festo, SCM, Roma, Frommia, Nastro-Žičnica, Wegoma, Univer ...)
- \* for moulders (Weinig, Wadkin, Gubisch, SCM, Harbs, Wegoma, Lestro-Ledinek, Guilliet, TSN, Chuet, Vierende, Georg Fischer, Verboom ...)
- \* for planers (Martin, Panhans, SAC, Kölle, Hofmann ...)

- **Purchase of new standard rollers**  
Over 300 standard roller types on stock;  
you order, we send immediately!

- **Special dimension rollers made to order**

If you can not find a suitable roller in our wide standard program, we will be glad to manufacture rollers according to your drawing.

- **Renewal of worn out rollers**

We remove old rubber coat and vulcanize new rubber or PU layer on cleaned roller core.  
Repair time: 5 working days (shorter term possible on request).

We are an official supplier for Holz-Her Maschinenbau GmbH.

We are an official supplier for Otto Martin Maschinenbau GmbH.

When ordering, please specify roller dimensions (diameter, width, bore, keyway) and the producer of the machine. You do not have to choose hardness of rubber, as we always use rubber that suits best to the purpose of the specific roller. On special request, we can coat rollers with the rubber of your choice.

## STEEL ROLLERS OF ALL TYPES AND DIMENSIONS

- **Purchase of new, standard rollers**

Many standard roller types on stock;  
you order, we send immediately!

- **Special dimension rollers made to order**

If you can not find a suitable roller in our wide standard program, we will be glad to manufacture rollers according to your drawing.

- **Renewal of worn out rollers**

We sharpen blunt teeth of used steel rollers. Repair time: 5 to 7 working days (shorter term possible on request).

*When ordering, please specify roller dimensions (diameter, width, bore, keyway), description of teeth (shape, direction), roller material (standard, chrome) and the producer of the machine. Order number **Z** is a general mark depicting all steel rollers.*

**Example:**

*Roller 140-50-35 ZB chr Weinig - means a steel roller for Weinig machine, 140 mm in diameter and 50 mm wide, for wet wood processing, helix-toothed, chromium plated.*

### Please choose

- **Teeth shape**

**Profile A** - Weinig standard profile

**Profile B** - wet wood profile

**Profile C** - standard Elastomeri profile

**Profile D** - old Weinig profile

**Profile E**

**Profile F**

**Profile G**

**Profile H** - hard wood profile

**Profile X** - knurled steel rollers

- **Teeth direction**

- straight-toothed - **order number R**

- helix-toothed - **no order number**

- **Roller material**

- Chromium-plated
- Standard

- **TECHNICAL RUBBER PRODUCTS**  
**Production and renewal**

- Rubber coated chain plates, plugs and rings for edgeling and bonding machines (Brandt, Homag, Holz-Her, Ott ...)
- Rollers for glue application
- Various technical custom made products

- **RUBBER CYLINDERS**  
**Production and renewal**

- for sanders
- for gluing machines (plain and threaded rollers)
- for staining machines (foam rubber)
- for paint, oil and varnish machines
- for transport rollers

**Max. cylinder dimensions:**

- max. length 3200 mm
- max. diameter 380 mm
- max. weight 500 kg

**Repair time: 5 working days (shorter term possible on request).**

- **SERVICE**

- Metal cylinder core production and repair of damaged cores
- Cylindrical and convex-concave grinding
- Dynamic balancing of cylinders
- Grooving of rubber cylinders

**Call us, we will be glad to offer  
a free professional advice.**
