

Pet Food & Rendering

ADVANCING SCIENCE FURTHER
TOGETHER FOR LONGER AND
FULLER PET LIVES.

We partner with pet food manufacturers and renderers around the world to solve the complex challenges that exist behind every bowl of pet food.

Kemin Pet Food & Rendering is a science driven organization built on collaboration, working closely with our customers to help them deliver safer, fresher, more appealing, and wellbeing focused products.

OUR SERVICES

Technical Services Managers

Ongoing customer support through a dedicated Technical Services Team. This team brings support across the globe, no matter where the customer is located. Leveraging extensive pet food industry experience, Technical Services Managers (TSMs) partner with customers to troubleshoot and find solutions for product-related issues throughout every step of the pet food manufacturing process.

Kemin Application Solutions

Every pet food production and rendering facility is unique, which is why we provide custom equipment solutions and training through a dedicated Kemin Application Solutions (KAS) team. Whether it's an antioxidant, antimicrobial or palatant, an ingredient's effective use depends on the proper application and distribution. Our KAS team is made up of experienced engineers and technicians who help install, maintain and optimize customer application equipment to ensure your ingredients are meeting your performance goals.

Customer Laboratory Services

Ongoing laboratory and analytical support through a dedicated Customer Laboratory Services (CLS) team. Our experienced scientists support customers in developing new products, troubleshooting stability and palatability challenges, and effectively using Kemin Pet Food & Rendering products to ensure your final pet food product is shelf stable, safe, delicious and nutritious for pets.

Commitment to You, and the Pets You Serve

At Kemin Pet Food & Rendering, science is a responsibility we share with our customers—to improve the lives of the pets you serve.

We work closely with pet food manufacturers and renderers, combining deep scientific expertise with a collaborative, real world approach. Every solution is grounded in the understanding that behind every formulation and process decision are pets whose health, vitality, and everyday moments depend on getting it right.

We take the science seriously—and apply it with purpose—so its impact reaches beyond products and processes, helping pets live **longer, fuller lives.**

OXIDATION CONTROL

Natural Antioxidants

NATUROX formulations are rich in mixed tocopherols, combining them with delta-tocopherols, botanical extracts and emulsifiers.

VERDILOX is a well-balanced blend of mixed tocopherols and botanical extracts with antioxidant activity.

VERAFYT is designed to leverage the power of botanicals by working in synergy with other antioxidants. The range includes PARAMEGA™ and ROSEEN®.

PRODUCT FEATURES:

- With ingredients of natural origin
- Not produced from nor containing ingredients produced from GMOs
- Sustainable
- Kosher
- Food grade

Individual product features may vary. Product offerings vary by region.

Synthetic & Hybrid Antioxidants

RENDOX offers blends of approved synthetic antioxidants for renderers.

HYBRILOX is a stabilization solution that provides BHA- and BHT-free options.

PRODUCT FEATURES:

- Diverse portfolio
- Broad spectrum of activity

Product offerings vary by region.

PALATABILITY

Palatants for Dry Pet Food Applications

PALASURANCE palatability enhancers are designed to improve the taste and aroma of dog and cat food products.

PRODUCT FEATURES:

- High performance
- Innovative flavor
- Label friendly
- Plant-based, meat-based and fish-based

Product offerings vary by region.

Palatants for Wet Pet Food Applications

PALIVATE palatants are designed to increase the palatability of wet pet food including loaf and chunk in gravy.

PRODUCT FEATURES:

- Withstand retort process
- Low inclusion in multiple formats
- Minimize effects to product integrity

Product offerings vary by region.

FOOD SAFETY

Mold Inhibitors

PREVION provides mold control and extends the microbial shelf life of treats.

PRODUCT FEATURES:

- Microbial control
- Safe handling
- Maintains palatability

Product offerings vary by region.

ACLARION is a synthetic line of preservatives formulated for the pet food supply chain to inhibit mold and yeast growth.

PRODUCT FEATURES:

- Microbial control
- Optimize moisture content
- Formulated for pets
- Ensures palatability

Product offerings vary by region.

Antimicrobials

ALLINSUR protects microbial and oxidative freshness of rendering raw materials and ingredients.

RENTERRA provides management of raw material and ingredient food spoilage risks through naturally sourced ingredients.

PRODUCT FEATURES:

- Microbial control
- Quality management
- Natural or synthetic

Individual product features may vary.
Product offerings vary by region.

HEALTH & WELLBEING

Functional Ingredients

PRALISUR is an algae-sourced 1,3-beta-glucan for immune support.

PRODUCT FEATURES:

- 100% Dried algae
- Small particle size (1-3 μm)
- 1,3-Beta-glucans: $\geq 50\%$
- Natural product

Product offerings vary by region.

SPECIALTY PROTEINS

PROSURANCE products include hydrolyzed proteins from a variety of sources.

PRODUCT FEATURES:

- Hypoallergenic
- Highly digestible
- Label friendly
- Highly palatable

Individual product features may vary.
Product offerings vary by region.
