The better workstation

ERGO-line: workstations with a system

As a successful family business, Kern Studer AG focuses on consistency and innovation. Our values are part of our corporate culture and have a direct influence over the product and service offering provided by Kern Studer AG. The ERGO-line brand initially arose as a result of own employees' need to optimise manual and physically demanding processes.

What we mean by a modern work system: optimal ergonomics, flexibility, and functionality – while adhering to strict quality requirements. Decades of experience in production and optimised workstation design have gone into ERGO-line workstation systems. The in-house testing of our products and our close relationships with our customers allow us to optimally address specific needs and set new standards on all levels.

Get to know us and our products – we will be happy to advise you.

About us

Based on the concept of optimising manual processes, not only digitally but also physically, ERGO-line was born as a new product branch of Kern Studer AG. Today, a team of several people works under the ERGO-line brand with the goal of offering customers innovative and flexible workstation systems.

HERE'S WHAT WE STAND FOR AS A TEAM:

- Quality
- Enthusiasm
- Engagement
- Competence
- Reliability

Satisfied customers are our best recommendation

Our customers are at the centre of all that we do. An important part of our business philosophy is to build long-term and reliable partnerships. The satisfaction of our clientele is particularly important to us, and ensures the success of our company.

Our clients are of the opinion that ERGO-line products are positioned at just the right price point. See for yourself – take a look at the customer testimonials regarding our workstation systems.

GOLDBECK

What our customers say about us:

We implemented the ERGO-line workstation solution for our Autostore facility. We are very satisfied with how the project turned out. We were able to optimise processes and create a good environment for employees, with optimal workstation design. We can recommend ERGO-line without hesitation.

Dieter Egloff, Head of Logistics & Purchasing, Peterhans AG

The on-site consultation, including high-quality visualisation, was very professional. The assembly has worked reliably and efficiently. We are fully satisfied with the services provided by ERGO-line. We were very pleased to work with such a reliable and competent partner.

Oliver Gerritson, Head of Operations, Connect Com AG

Thanks to the diverse and extensive range of products, we were able to design our work tables in the incoming and outgoing goods areas at our new automated picking warehouse according to our own design ideas. The communication and consultation was to our complete satisfaction. We were very pleased to be cooperating with such a competent and reliable partner in ERGO-line.

Jens Pfister, Outgoing Area Warehouse Supervisor, Europe Chemi-Con GmbH

TESTIMONIALS

OUR EXPERIENCE

Based on numerous national and international projects, we have been able to build up a unique wealth of knowledge, with core competencies around the topic of workstation systems. Here is what we offer our customers:

- A combination of experience and enthusiasm for further development
- Practice-oriented and thoroughly tested product range
- Personal advice and support from employees with many years of experience

STANDARD PRODUCT RANGE

ERGO-line offers a comprehensive standard product range, in its cost-effective modular system. All products are compatible and have a uniform appearance. With over 100 additional components, your workstation remains expandable and customisable at all times.

- Complete system with over 100 additional components
- Expandable or customisable at any time
- Short delivery times

Surfaces

- Standard colours:
 - RAL 9006 white aluminium combined with RAL 7016 anthracite grey
- Special colours on request.

IN-HOUSE MANUFACTURING

Thanks to its own in-house development and production, ERGO-line produces workstations that boast the highest quality standards throughout Europe. In this process, our product range is constantly being developed and expanded according to the latest trends.

Benefit from our expertise as a manufacturer and let our long-standing employees advise you.

- In-house development and manufacturing
- Consistent system construction
- Directly from the manufacturer

Your advantages at a glance

SPECIAL CUSTOM DESIGNS

As a manufacturer, ERGO-line specialises in unique, custom-made products. Customised workstation systems, tailored to your process, are our strength.

Using our local production facilities, we quickly and reliably manufacture custom solutions, even in small quantities.

- Tailor-made custom solutions
- Even in small quantities
- In close cooperation with our customers

ERGO-line, for the entire production process

Whether manufacturing, goods flow or dispatch processing, ERGO-line workstation systems cover the entire industrial distribution chain (supply chain).

Our staff will advise you at various stages during the production process and will develop proposals tailored to your business.

GOODS RECEIVING & GOODS CONTROL

- Universal tables
- IT stations
- Tables for printers
- Mail sorting tables

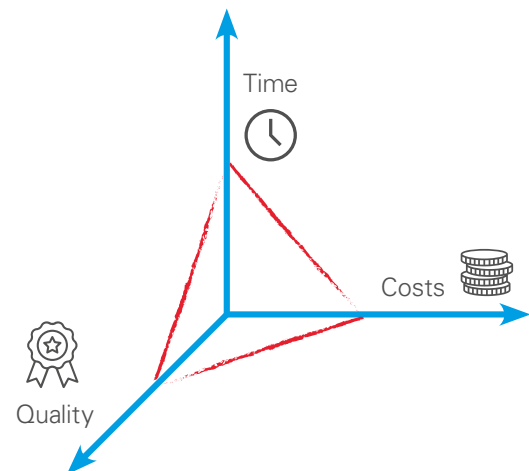

MANUFACTURING & ASSEMBLY

- Individual workstations
- ESD workstations
- Electronics workstations
- Measuring and testing workstations
- Workbenches

Optimisation of the production process with ERGO-line workstation systems

Time, cost, and quality are three important pillars in production. Modern manufacturing operations address the classic requirement to provide customers with the products they need as quickly and as inexpensively as possible, at the best possible quality.

Taking these three factors into account, ERGO-line works closely alongside you to design the optimally equipped workstation for your business.

GOODS FLOW & MATERIAL SUPPLY

- Interlinked workstations
- Mobile workstations
- FIFO storage racks
- Free-standing superstructure with perforated metal plates
- Roller conveyors
- Transport trolleys
- Box and magazine trolleys
- Picking and storage carts

SHIPPING PROCESSING

- Simple packing tables
- Modular packing tables
- Packing tables with integrated filling systems
- Cutters
- Roller tables

Flexible, expandable at any time

ERGO-line is very versatile! Basic frames provide the basis for a simple workstation. Not yet sure how you want to work and what you need?

No need to worry, the workstation grows with your project.

One system for the entire company

The possible uses for ERGO-line are as individual as your needs. The base frames are available in various designs to ensure optimum planning.

Combination of table and feeder with roller conveyors

This allows you to combine classic elements from assembly and packing. The focus is on the optimum solution. ERGO-line is a workstation system for the entire process flow in the company.

Modern packing table combination with lifting element

ERGO-line goes into depth! We offer the necessary accessories for the individual specialist areas. Even with large packages, ergonomic packing is guaranteed by the lifting element. Fast and quiet with electric drive.

- ✓ One system for the entire company
- ✓ Modern look
- ✓ Flexible, expandable at any time
- ✓ Robust, high-quality construction

Go to 3D view

Robust, high-quality construction

The ERGO-line range also includes assembly and/or electronic workstations. The height of all base frames can be adjusted manually using a clamping screw, hand crank or electric motor. All components are powder-coated as standard.

Height-adjustable assembly workstation and transport trolley with electric motor

ESD protection

ERGO-line has many years of experience in the manufacture of ESD workstations. All table frames and superstructures have a dissipative powder coating as standard. Accessories such as drawer cabinets, chairs, containers and floor mats are available in a dissipative version.

Trolleys

ERGO-line includes all aspects that are relevant for the modern workplace. Material flow and provision can be solved in many ways. We offer you a flexible system of transport trolleys for this purpose.

The grid widths of the transport trolleys are identical to the table super-structures. You benefit from a wide range of accessories.
