Eko Tear® Tear Tapes

Effortless & Safe Package Opening — Filmic & Eco Paper Solutions

What Are Tear Tapes?

Tear tapes (also known as tear strips or tear off ribbons) are narrow adhesive tapes integrated into packaging to allow **easy, clean, tool free opening**, whether the package is made of paperboard, corrugated fiberboard or plastic film. They improve user experience while preserving package integrity until opening.

Product Types & Key Benefits

Filmic Tear Tapes (MOPP based)

- Durable and tear resistant backing for heavy-duty packaging
- Available with either hotmelt or natural rubber adhesive for strong adhesion
- Multiple color options (red, white, black, blue, yellow) for branding or differentiation— Performance levels: Basic (standard tear), General and Heavy Duty (maximum strength)

Ecological Paper Tear Tapes (Kraft based)

- Biodegradable, recyclable backing with natural rubber adhesive
- Available in Basic and Heavy Duty grades for different tear resistance needs
- Designed for eco conscious packaging with minimal plastic footprint

Eko Tear® Tear Tapes

Effortless & Safe Package Opening — Filmic & Eco Paper Solutions

Key Advantages Across Both Types:

- Tool-free, user friendly opening
- Enhanced safety: reduces injuries from opening tools
- Branding potential via custom printing and tape color
- Preserves product integrity
- Suitable for automated packaging lines (supplied on cross wound spools)

Material & Production Highlights

- **Cross wound spooling**
enables extremely long tapes (up to thousands of meters) for fewer production roll changes, smooth unwinding, and space efficient storage.
- **Available backings:**
 - MOPP film for high tear strength and flexibility
 - Kraft paper for eco friendly, sustainable use
- **Adhesive options:**
 - Hotmelt for fast tack and quick use
 - Natural rubber for strong adhesion on porous surfaces

Standard Widths

4mm, 5mm, 6mm
(and other widths up to 25 mm available on request)

Details of standard sizes for individual products can be found on the website.

Applications & Use Cases

Perfect for industries where packaging usability and sustainability are priorities:

- **Consumer goods** (food, electronics, personal care): improves customer experience
- **E commerce:** secure, tamper evident yet simple opening
- **Industrial packaging:** heavy-duty cartons and protective packaging

Why Choose EKO TECH for Tear Tapes?

- Over **25 years** of converting expertise in adhesive and technical materials, with ISO 9001 quality systems and recognized as **a tesa® Platinum Converter** and partner of 3M®, Rogers®, Binder®, etc.
- Full **in house converting** capabilities: rewinding, slitting, lamination, sheeting, die cutting, CNC/ laser cutting, and cross wound spooling for customization

Support for **private - label branding**, custom colors, printed logos/messages, and adhesive/tape selection based on application needs.
