Description

The PUMPKIN®20 consists of a pump unit and a 3-level float switch that controls the pump (switching it on and off). The transparent float unit is connected directly to the outlet pipe of the A/C unit drip tray or to the condensate outlet line. The supplied package includes the pump, the 3-level float switch and mounting accessories, i.e. double-sided padded tape for attaching the float switch and an anti-vibration pad.

Usage

The PUMPKIN®20 is the ideal choice for use in split wall air conditioning systems. With its extremely slim design and low noise level, it is the perfect fit for air conditioners with limited space.
