Guangdong SAT Industrial Co., Ltd

The company has nearly 2,000 employees, including nearly 400 management and technical personnel. The office production area covers nearly 90,000 square meters, including 75,000 square meters of self-owned workshops, 40,000 square meters of clean production workshops, and the total investment in fixed assets is nearly 400 million yuan. In 2021, the total output value of the company is nearly 2 billion yuan, and the tax payment is nearly 60 million yuan. The company consists of "security control center, intelligent control center, numerical control center, touch center, parts center, a total of five manufacturing centers.

In order to ensure the efficient and orderly operation and management of the enterprise, the company has set up six functional departments, including "operation and sales management center, technology research and development center, quality assurance center, supply chain management center, administrative management center and financial center". Together with the five major manufacturing centers, the company's organizational structure is the basic platform for the company's long-term development.

SAT has always adhered to the business policy of "to the essence and sincerity, the pursuit of excellence", and has accumulated a large number of outstanding customer groups and many leading enterprises with excellent corporate culture and historical precipitation. Through these customers, see Antong's products cover Europe, America, South America, the Middle East, South Korea and other countries and regions, forming a solid business foundation.

# Company History

## 2007

**In 2007**, Shenzhen SAT Electronics Co., Ltd. was established. Its main business is black and white display modules and color LCD modules.

## 2014

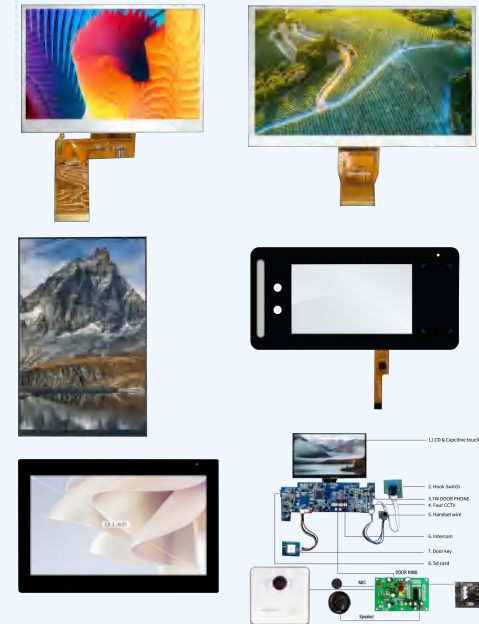

**In 2014**, Set up an international sales company, so that the products are sold all over the world. At the same time, the color LCD screen extends to tablet computers, car navigation, industrial control equipment

## 2015-2018

**In 2016**,Annual shipments of color LCD exceeded 15KK, becoming the leading enterprise in the same industry

**In 2018**, invest in the establishment of Guangdong Vision Antong Industrial Co., LTD., invest in the production of capacitive touch screen, to facilitate customers one-stop procurement

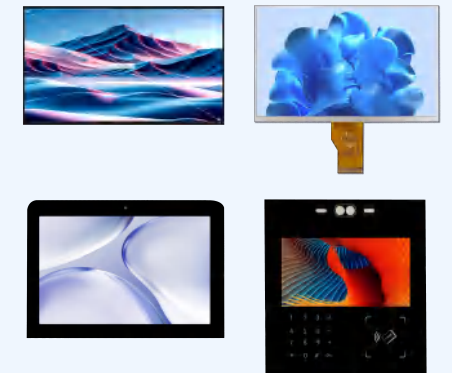

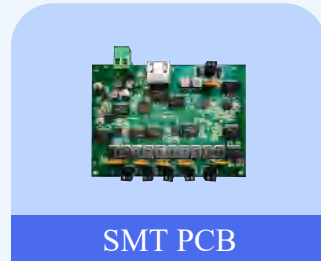

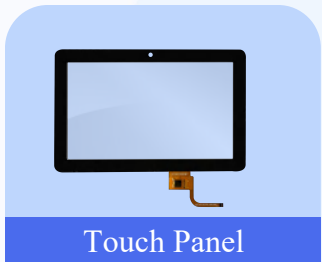

## 2019–2022

In 2019, Guangdong Vision Antong Industrial Co., Ltd. applied to build the vision Antong Industrial Park, which was approved by the Dongguan City People's Government as a major construction project in 2019, and is the four fast projects of the major construction projects in Dongguan City during the same period of "breaking ground fastest, building fastest, putting into operation fastest, reaching production acceptance fastest".

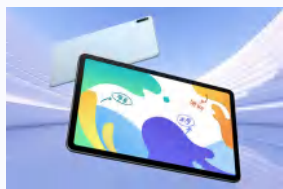

In **2022**, Vision Antong Group invested in the establishment of Guangdong Vision Antong Bile Intelligent Technology Co., LTD., operating home intelligence, industrial robots, KNX main line control products, began the fourth transformation and upgrading.

In 2023, Industry position and comprehensive strength greatly improved management system upgrade, OEM, ODM business to enhance capital cooperation Antong brand in the market dominance.

## Production Centers

## Security Control Center

The security control center covers an area of about 7,000 square meters, including 700 people. With nearly 20 backlight assembly lines and 10 fully automatic polarizer placement machines, 10 FOG Bunding production equipment, and 10 film cutting equipment and 20 fully automatic glass cutting machines, the monthly production capacity of this department can reach 2KK. The products from this department are mainly used in security industrial control, vehicle electronics, and 4-10.1 inch LCD screens in overseas markets.

## Intelligent Control Center

Composed of about 120 people, the intelligent control manufacturing center covers an area of about 3,000 square meters. With the help of more than 40 SMT automatic placement machines, this department can hit 10 million points per day. In addition to the production of communication security intercom system products, this department is also responsible for the production of LED lamp strips and FPC processing production as well as SMT processing.

## Numerical Control Center

The Numerical Control Center, formed by about 800 people, covers an area of about 25,000 square meters. It has nearly 20 backlight assembly lines, 20 fully automatic polarizer attachment machines, 20 FOG Bunding production equipment, 40 film cutting equipment and 30 fully automatic glass cutting machines. It mainly produces 7-15.6-inch LCD screens for digital consumption and notebook market, with a monthly production capacity of 1.5KK.

## Touch Center

Formed by about 400 people, Touch Center covers an area of about 15,000 square meters. The main production cover plate, TP and assembly, production capacity of 600K. It has a full set of TP production equipment, such as more than 20 automatic CNC engraving machines, more than 20 digital screen printing machines, more than 10 automatic laser machines and fully laminating defoaming hot pressing and other related equipment.

## Parts Center

Parts manufacturing center has 100 employees workshop and office area of about 7,000 square meters. The center composed of hardware department and plastic department shoulders mold research and development, design, production and processing and other important production links.

Hardware production department has 15 automatic hardware stamping equipment, the monthly production capacity of 3.5KK; The Injection Molding Production Department has 20 imported light guide plate injection molding machines with a monthly production capacity of 4KK.

Our company's quality team has about 150 people, college degree and above about 70 people. It has 60 instruments and Q equipment such as gold-nickel thickness gauge, remote integrating sphere and spectrum analyzer. Quality system is sound, we have passed ISO9000 and 16949 related quality system assessment and verification. To provide customers with quality products is the pursuit of SAT.

The Operation department consists of supply chain, sales and after-sales service, quality management and certification, technical management and technical training teams, logistics and finance. This department aims to better serve our customers, coordinate and manage the design, production and sales of various departments; Ensure that the company's design, production and sales work closely and efficiently. Our company is established to create high-quality and high-level sharing, and form a tight management structure promoted by internal and external docking, unified management and fragmented responsibility, centralized system and responsibility system.
