

GREEN WORKWEAR
JUST SUSTAINABLE

G

G

THE *Green Workwear* GMBH

When two are pursuing the same goal, there are good reasons to walk the path together. This is how the cooperation between Dibella longlife textiles and REISINGER premium workwear came to life. Our common goal is to develop a 100 % sustainable workwear collection for the healthcare sector that is suitable for industrial laundering.

Dibella longlife textiles was founded in 1986 and is a recognised textile service partner throughout Europe. With a corporate philosophy focussing on fairness and openness, the company has a professional supply chain management system with in-depth knowledge in the areas of sustainability, recycling and reprocessing.

"With all Green Workwear products that are certified with the Green Button, you are acting in compliance with the EU Supply Chain Act. With us you are on the safe side!"

KLAUS BAUR

REISINGER premium workwear was founded in 2007 by Harald Reisinger and has stood for the distribution of industrially launderable workwear for the healthcare sector from the very beginning. Harald Reisinger has been active in the field of clothing production and sales since the 1990s.

Together, under the umbrella of Green Workwear GmbH, we offer a professional partner for customers in the textile service and healthcare sector.

"Our guiding principle at Green Workwear: We take responsibility for the environment and all those involved in the supply chain."

HARALD REISINGER

 **DIBELLA**
GOOD WORKWEAR

Reisinger
PREMIUM
WORK WEAR

PEOPLE SHOULD BE ABLE TO WORK IN CLOTHING THAT FITS PERFECTLY.

FOR *People*

We work towards this goal with a great deal of passion and commitment.

By 2030, we will achieve an optimal balance between socially and ecologically responsible production and a far-sighted resource economy.

For example, we will only use fair trade organic cotton, TENCEL™ Lyocell, recycled polyester, Cotton made in Africa (CmiA) cotton or other sustainable fibres for our particularly durable textiles.

We keep our supply chains absolutely transparent and supplement this with recognised and demanding seals and standards for our production partners

By 2030, we aim for all of our products to be 100 % upcyclable and our entire process chain to be 100 % climate neutral.

AND THE *Environment.*

Our self-commitment applies to our external actions as well as our internal ones: together with all employees, we are committed to continuously reduce our corporate carbon footprint and realise concepts that benefit everyone.

OUR Certificates

GREEN BUTTON

With the Green Button, you are buying sustainably, socially and ecologically produced textiles: As a state seal for textiles, the Green Button is particularly trustworthy and is becoming increasingly important.

[g-k.eu/dibella](https://www.g-k.eu/dibella)

COTTON MADE IN AFRICA

With Cotton made in Africa, we are making our business model more sustainable. This enables us to minimise the environmental impact of our company and support the people in the local growing areas.

GLOBAL RECYCLED STANDARD & RECYCLED CLAIM STANDARD

Certification in accordance with the Global Recycled Standard (GRS) and the Recycled Claim Standard (RCS) guarantees recycled textiles with additional ecological and social criteria. At Green Workwear, we use recycled polyester and guarantee traceability along the entire supply chain as well as transparent communication.

textileexchange.org/recycled-claim-global-recycled-standard/

OEKO-TEX® MADE IN GREEN

When you buy products with the OEKO-TEX® MADE IN GREEN label, you receive textiles that have been tested for harmful substances and are manufactured in sustainable factories. Each production step is traceable and can be accessed transparently via the homepage.

[oeko-tex.com](https://www.oeko-tex.com)

Transparency IN THE SUPPLY CHAIN

Get a detailed overview of the life cycle of your product, from the origin of the raw materials, through production, transport and distribution to recycling options.

Access additional information about suppliers, product certifications and labels as well as the brand's social commitment and environmental sustainability.

The **respect-code** makes our supply chain traceable for you!

**BREATHABLE, COMFORTABLE
AND MADE FROM SUSTAINABLE RAW MATERIALS:**

Excellence

Woven from 50 % Cotton (CmiA)
and 50 % recycled polyester.

Particularly breathable and comfort-
able to wear. Quick-drying and durable
thanks to the polyester content.

Available in six colours with a basis
weight of 190 g/m² as well as in white
with 210 g/m².

OUR *fabrics*

Comfort

Woven from 50 % Lyocell (TENCEL™)
and 50 % recycled polyester.

TENCEL™ Lyocell
TENCEL™ fibres are cellulose fibres
obtained from sustainable wood.
They are very robust, abrasion-resis-
tant, soft and plain and have a co-
oling effect.

TENCEL™ fibres are of purely natural
origin, offer a very special wearing
comfort and a uniquely soft feel. TEN-
CEL™ is a brand of Lenzing AG.

Available in four colours and white
with a basis weight of 195 g/m².
