— PROTECTION AT SCALE

A Selection of Our Field-Proven Security Solutions

DDoS Protection: Fully automated protection against overload attacks.

CDN: Highly scalable performance for your business processes.

Web Application Firewall: The answer to critical cyber threats and zero-day vulnerabilities.

Bot Management: Protect your website from unauthorized access and malicious bots.

NEW AI Workspace: The AI solution for European organizations with sensitive data.

NEW Captcha: The only European captcha service powered by 100 billion daily CDN signals.

AI for European Organizations with Sensitive Data

The pilot phase is over: generative AI has long become part of daily operations for many organizations. For an organization-wide rollout, however, clear rules for compliance, cost, and security are often missing.

Myra AI Workspace addresses this with a central, secure work environment for your entire organization. The solution gives your employees access to leading AI models through a familiar chat interface, while you retain control over data flows, budgets, and usage.

What blocks AI rollouts

Shadow AI at work: 41% use private accounts for work tasks.

MYRA SECURITY 2026

1 in 2 employees has held back from using AI due to data privacy and compliance concerns.

MYRA SECURITY 2026

Only 35% of companies have transparent visibility into their AI costs.

KPMG 2026

39% are concerned that company data could end up in the wrong hands.

BITKOM 2026

What Myra offers instead

- One familiar interface for 20+ AI providers
- Sensitive data protected on Myra's own certified EU infrastructure
- Audit-ready with GDPR-compliant logging and guardrails
- No vendor lock-in: switch models at any time
- Predictable costs with budgets for organization, team, and user
- Security proven for critical infrastructure since 2012

What is Myra AI Workspace?

The best of both worlds

Myra AI Workspace combines the governance of an AI Gateway with the usability of an intuitive AI Adoption Platform in a single, central solution.

- No parallel setup of a gateway layer and a separate chat application
- Governance that does not cost usability – guardrails apply in the background
- One vendor, one contract, one operating model

Six Reasons for AI Workspace by Myra

The best of both worlds

- One interface for all approved models
- Shared team projects keep knowledge in the organization
- Familiar frontier-model interface: intuitive from day one

Keep your data reliably secure

- Sensitive prompts stay on open-weight models in the EU
- No detour through US clouds
- Full control over every input
- Live security feedback helps users spot risks in every chat

Use AI that withstands every audit

- GDPR Art. 30 audit log: every request traceable
- Guardrails enforce your policies automatically
- Automated PII masking protects personal data

Avoid vendor lock-in

- Free choice among 20+ providers, including Mistral
- One endpoint keeps integrations simple
- Switch models without touching code

Keep your AI costs under control

- Budgets per organization, team, and user make spending predictable
- Every cost allocated to its source
- Exact-match cache: repeated requests are not billed twice
- Open-weight models on EU infrastructure lower token costs

Choose a sovereign security partner

- 100% EU shareholder structure
- No CLOUD Act exposure: your data stays under EU law
- Developed by a team delivering government-grade security since 2012

Your Security Control Center

Easy management, monitoring, and reporting via web interface.

The Myra App allows you to quickly and easily configure all Myra protection functions via a web GUI. You also have direct access to extensive monitoring and reporting features.

- Quick access to the most important configuration options
- Performance Dashboard with all key figures
- Detailed statistics with numerous filter options for full transparency
- Comprehensive reporting on traffic, bandwidth, and requests
- Convenient user and group management

— TRUSTED BY REGULATED INDUSTRIES

Myra Protects You from Harmful Web Traffic & AI Risks

Myra protects your organization against a wide range of malicious traffic, from DDoS attacks and bad bots to cross-site scripting (XSS) and SQL injection. The same platform also unlocks AI for your entire workforce – without compromising on compliance, cost, or security.

- Highly certified (BSI C5 Type 2, ISO 27001 based on BSI IT-Grundschutz, PCI DSS)
- EU-sovereign technology, Made in Germany
- 24/7 SOC support from security experts

Your safety, our mission: Myra protects customers in highly regulated sectors

Myra's solutions make a crucial and reliable contribution to protecting both our customers and our own IT infrastructure. As a highly certified German provider, Myra also delivers a particularly robust compliance standard that is especially valued by regulated customers.
