

Movement matters

We create places where stories are made

Places where people can spend their time actively, meaningfully, working on themselves which brings feelings of joy.

Spaces where people meet and create new friendships. Spaces where new communities and stories are created.

We build our story

We specialize in building and producing original, high-quality workout parks, fitness equipment, sports fields, and recreation zones. These areas are composed of various types of products that require construction readiness and professional implementation. In addition to construction, Octago also focuses on creating innovations in the field of education around various physical activities for the health of citizens.

Because if something really matters, it is exercise.
Life is exercise.

We build our story.

We offer our customers complete solutions from design to implementation of projects, including the production of key elements, workout equipment, and professional consultation.

Young

We are a dynamic Slovak company established by sports enthusiasts with the vision to get people of all ages to work out. We build places, where stories are made.

**We
design, test,
manufacture!**

We design, test and manufacture our products in our production hall in Vranov nad Topľou and most of our suppliers come from Slovakia. Thanks to this, we can guarantee the high quality of all our products.

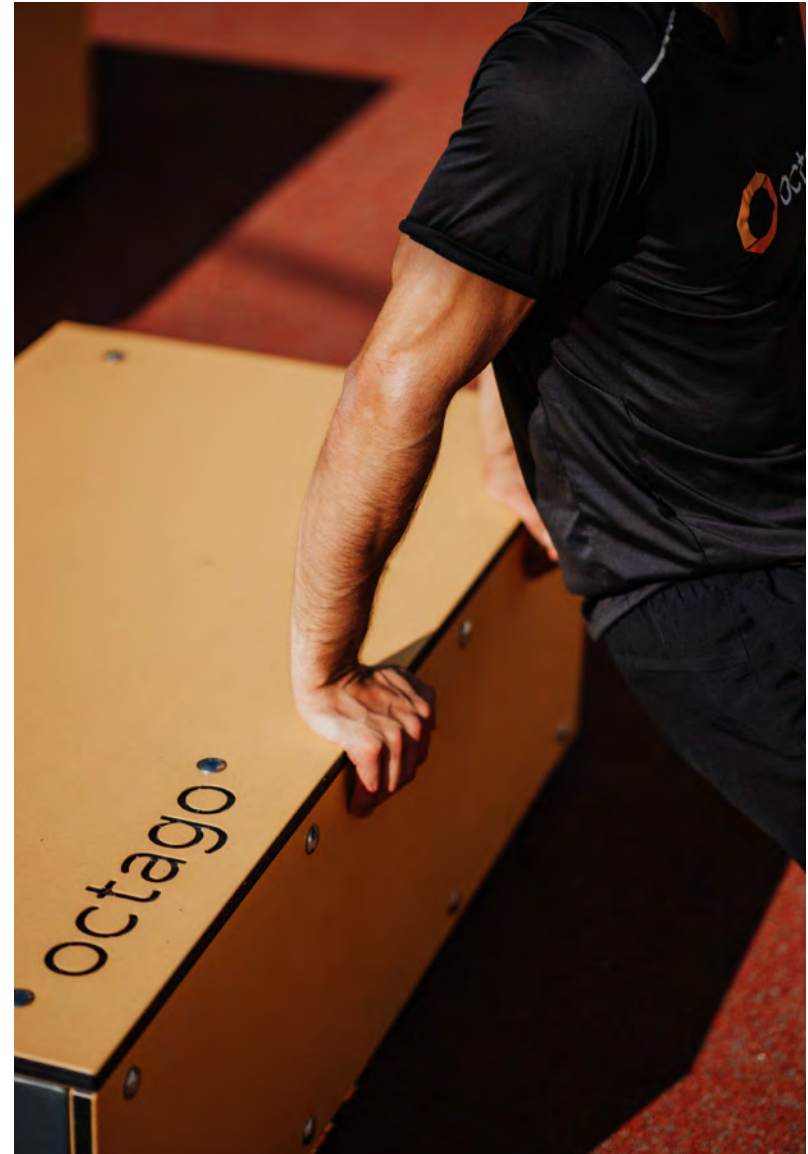

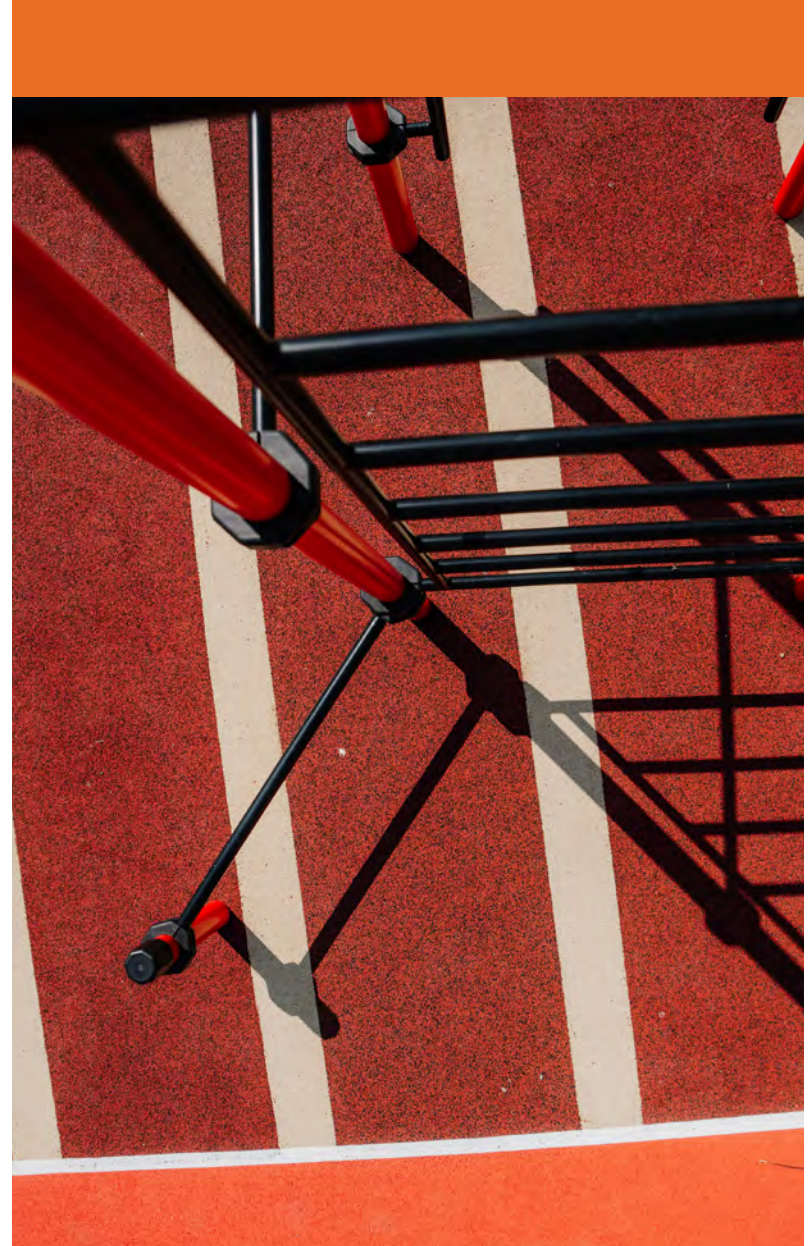

Sportgo offer

In our product portfolio, you will find a diverse range of products, including workout setups, fitness elements, para workout equipment, mini football pitches, and countless accessories created by us.

The treated surfaces on all our elements are resistant to adverse weather conditions, corrosion, color fading, and mechanical damage.

Precision in Design

The dimensions and layout of the elements are not random but based on many years of experience and recommendations of active exercisers. Our products combine design with functionality and quality.

Design

We will design a project for you, including a price calculation based on an inspection of the place for future implementation.

Project

We will offer full cooperation in the design of future projects and access to DWG and 3D files for designers and architects.

Implementation

We will implement a project for you from A to Z according to your exact requirements and the project proposal.

Project activity

- We look at things from a higher perspective.
- We offer professional assistance with any project design.
- We provide professional consultation in the design of complex sports fields and leisure spaces, or the development of a tailor-made project.

Octago smart

Octago smart

People exercising on our workout playgrounds can easily scan the QR code on a specific training element.

After scanning the code or entering the URL, they are automatically redirected to our web application where they will find video instructions on how to perform the exercises correctly. The application serves as a database of exercises for easier orientation of the space.

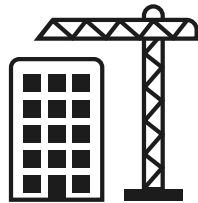

Our customers

Municipalities

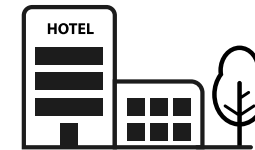

Complete solutions from design to implementation of projects, including professional consultation.

Developers

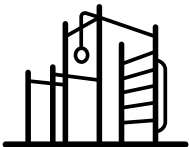

Cooperation in the design of parks and green spaces, including technical documents for designers and custom manufacturing.

Hotels and resorts

Our products as guest accessories for sports or gaming events.

People

Playgrounds and exercise sets directly in the gardens of family houses.

Fitness centers and sports clubs

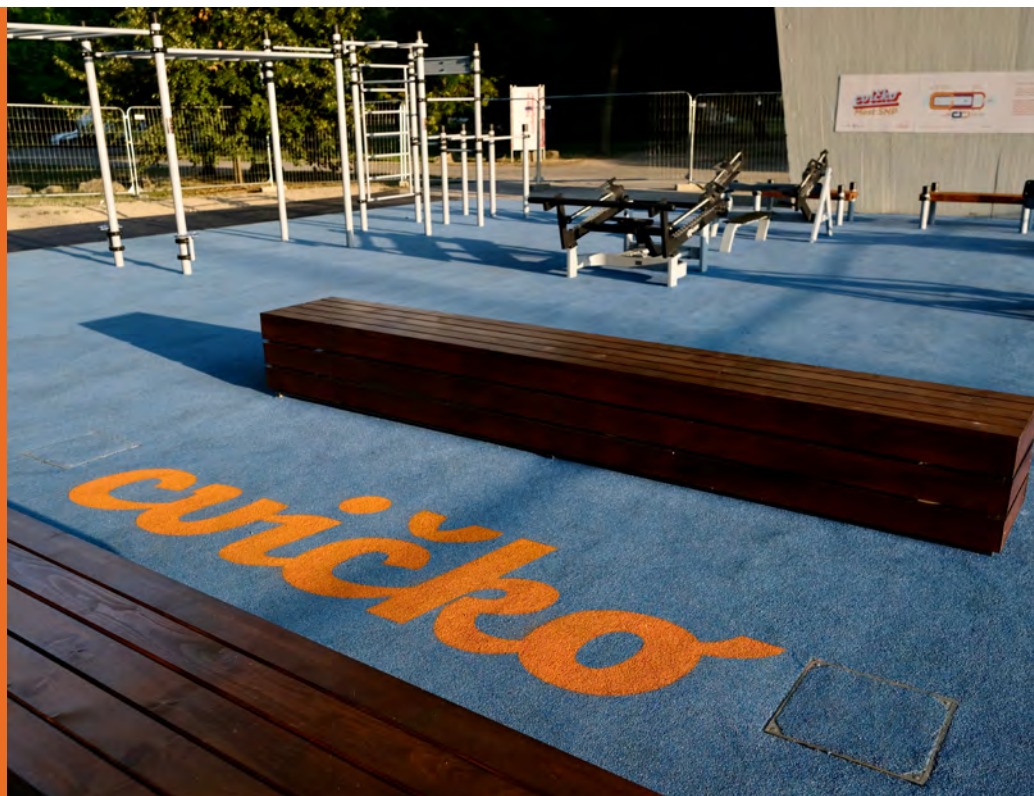

Design of solutions right up to the implementation of the project.

Octago team

In 2014, as young sports enthusiasts, we transformed our passion for calisthenics into a business. We started by helping our city build the largest workout park in Slovakia, which led to the founding of Octago, dedicated to creating spaces for active and healthy living.
