

RMC

CO₂ / R744 & R290

NATURAL REFRIGERANT SOLUTIONS

Industrial refrigeration engineered and manufactured by RMC

CHILLVENTA 2026

Hall 5 / Booth 5-326

RMC designs and manufactures industrial refrigeration equipment using natural refrigerants CO₂/R744 and R290. Solutions include compressor packs, refrigeration units, and equipment that can be adapted to the technical parameters of a specific project. By combining in-house engineering expertise with manufacturing capabilities, RMC can work with both standardized configurations and complex custom-engineered solutions.

Engineering

Equipment is developed according to technical requirements, operating conditions, required configuration, and system parameters.

Manufacturing

RMC manufactures standardized and custom solutions, adapting the equipment configuration to a specific task or to a partner's requirements.

Natural Refrigerants

CO₂/R744 and R290 are key technologies within RMC's natural refrigerant portfolio.

RMC

OEM & Partnership

RMC is open to manufacturing cooperation with international engineering and installation companies, dealers, distributors, and OEM partners.

APPLICATION AREAS

Food Retail

Food Processing

Distribution Centers

Cold Storage

Logistics
