What Is tenfold?

As a No-Code Identity Governance & Administration solution, tenfold makes sure the right people have access to the right resources and offers in-depth visibility into user privileges and IT events.

Advantages at a Glance

All Systems

From Active Directory to Entra ID and business applications: Govern access in all IT systems through a central, automated hub.

All Workflows

On/offboarding, self-service, access reviews and real-time visibility. For all users, permissions and unstructured data.

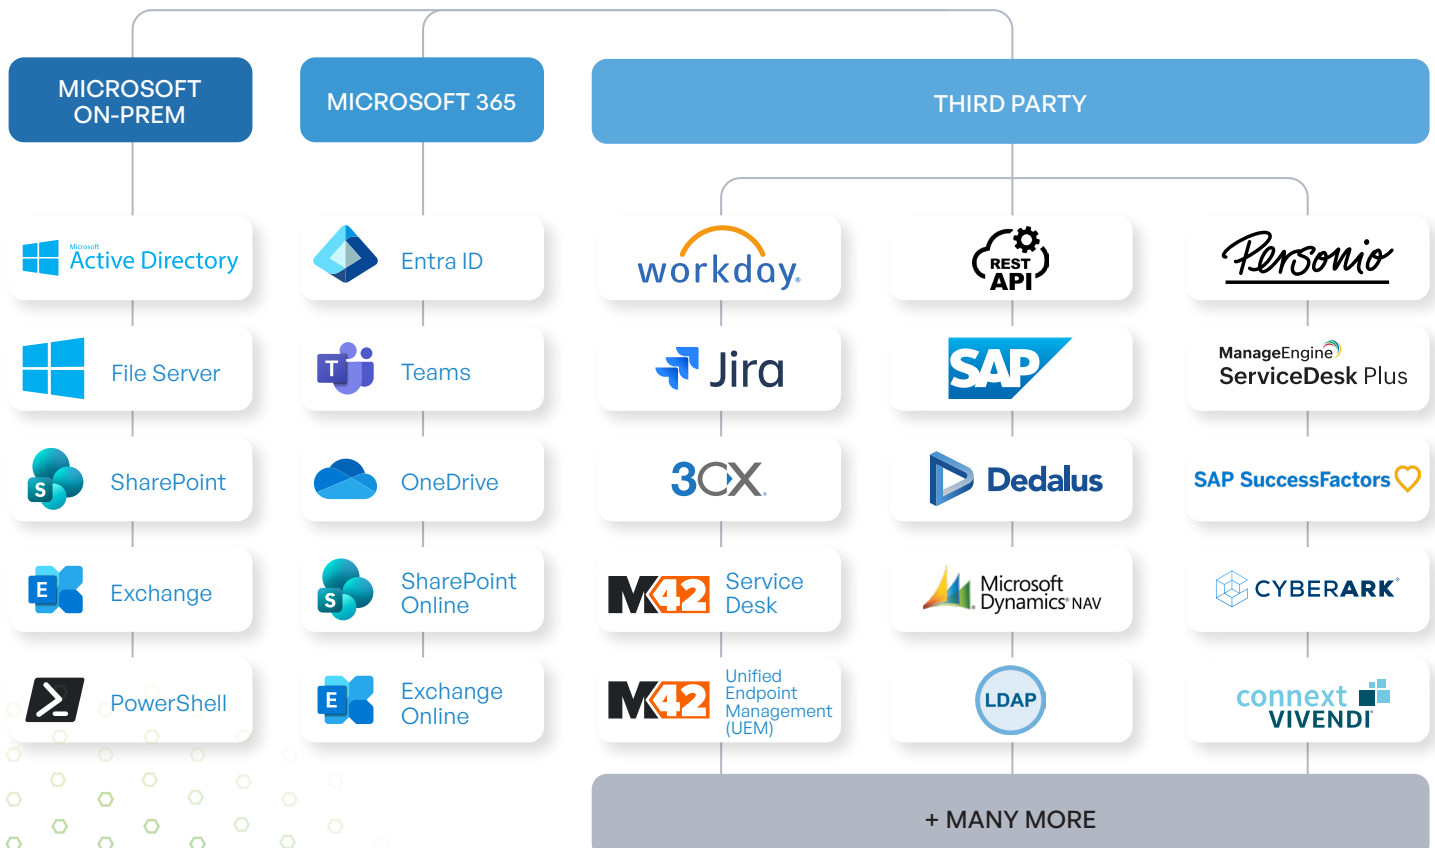

No-Code IGA

Our no-code setup and out-of-the-box integrations make tenfold quick and easy to deploy, operate and maintain.

Out-of-the-Box Integration

tenfold includes a wide range of off-the-shelf plugins, allowing you to quickly integrate the apps you use.

Competitive Comparison

	Data Governance Tools	Legacy IGA	tenfold
Features	✗ Limited feature set, no flexibility	✗ Excessive scope, highly complex	✓ Comprehensive governance, quick & easy
Setup	✗ Quick implementation due to limited scope	✗ Heavy customization, years of setup	✓ Up and running within weeks
Operation	✗ Low effort due to missing workflows	✗ High effort, needs team of specialists	✓ Can be managed by one person part-time
App Support	✗ No support for third-party apps	✗ Challenging, requires custom scripts	✓ Out-of-the-box support for your apps
Costs	✗ Inexpensive, but high hidden costs	✗ High initial costs, huge ongoing expenses	✓ Attractive pricing & inexpensive setup

Features

Lifecycle Management

Use access roles to automate on/offboarding and ensure the right level of access for every user.

Self-Service & Workflows

Free up your help desk with self-service access requests, password resets and customizable approval workflows.

Access Reviews & Separation of Duties

Regular privilege audits and automatic SoD enforcement prevent conflicts of interest and data breaches.

Data Access Governance

Gain complete visibility into user access, from the application level down to folders and files.

Event Auditing & Change Tracking

Monitor events, detect threats or critical changes and respond with confidence.

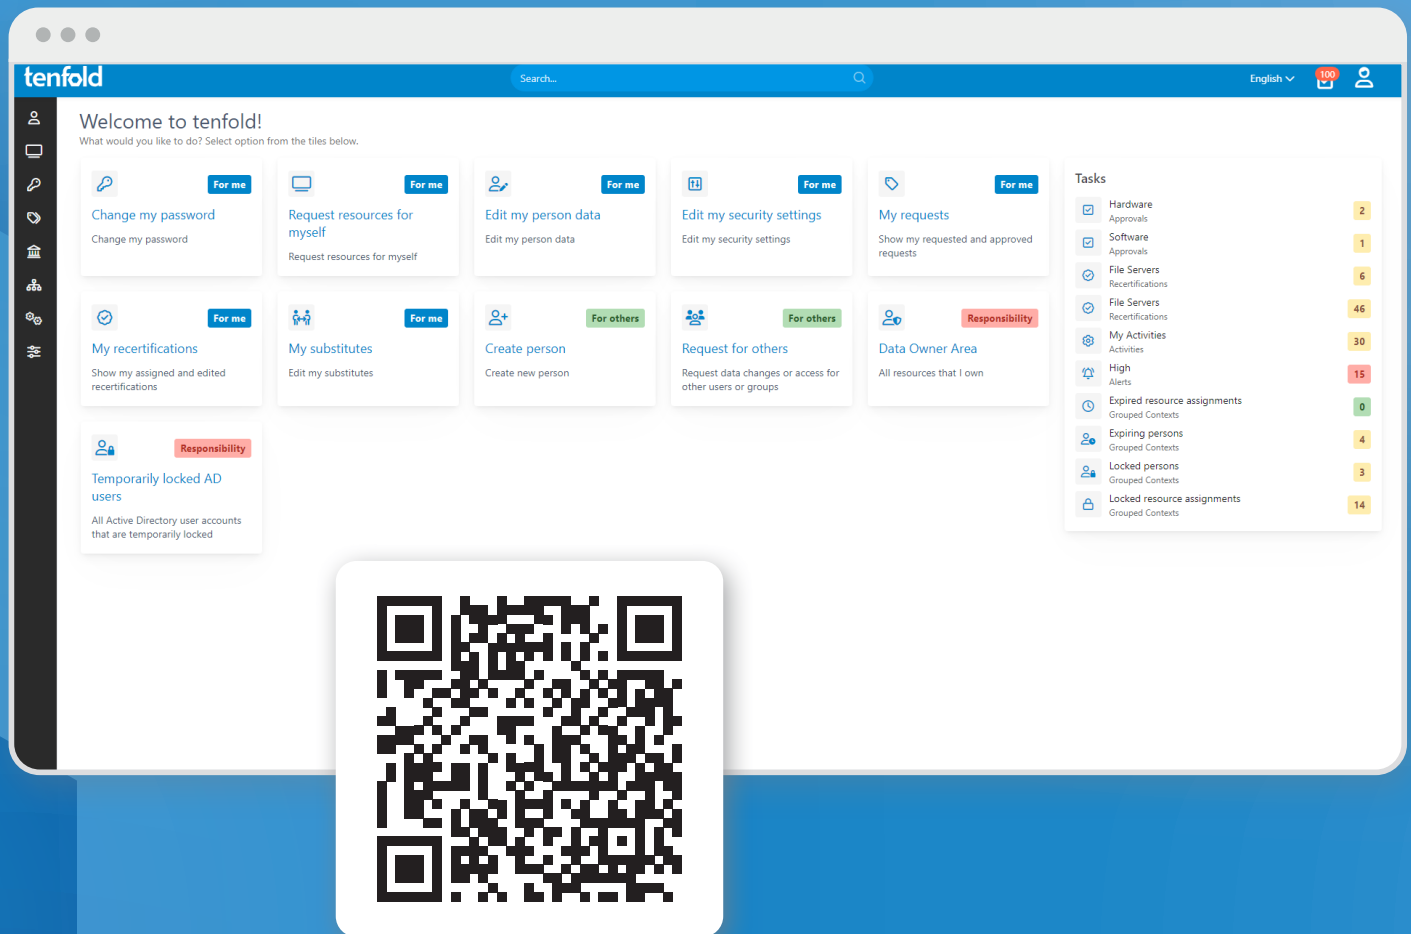

Cloud Sharing Governance

Stop cloud data leakage with detailed reporting and access reviews for cloud sharing.
