

## - PICNIC SET -

AMBASADOR Super Premium product line - completes our offer of sausages for dogs. These extremely innovative, practical and healthy meals are a rich source of protein, fiber, minerals and vitamins. The first picnic set for dogs on the market - a mixture of muesli with dried meat and vegetables, served in an edible bowl!

The Picnic Set is offered in a special box with a handle. Both muesli and the bowls can be sold separately in packages.

Suggestion of serving, in 2 simple steps:

If the dog does not eat the bowl with the meal, it will decompose safely for the environment within several days.

### AMBASADOR PICNIC SET 4 DOGS EDIBLE BOWL MUESLI

#### BIODEGRADABLE, EDIBLE BOWL

The base component of our picnic set. An innovative product, **100% natural and safe**, but also... crispy and tasty! The bowl can be consumed by dogs together with a meal - it is a food product, **a rich source of fiber**, supports digestive processes. It is made only from bran and water, in a process based solely on high temperature and pressure, without the use of any chemicals that could penetrate into the food. The bowl is completely biodegradable, it decomposes within 30 days. An alternative to non-ecological disposable plastic bowls or impractical, easily permeable paper dishes. It is perfect for traveling, at a picnic or for a longer walk.

#### MEAT

We fill our bowl with a dish, the main ingredient of which is dried, minced meat. We use selected beef or venison, dried in controlled conditions to maintain the maximum nutritional value and to provide **a solid portion of protein** in the dog's diet.

#### MUESLI

A healthy and filling addition to the dog's diet - a mixture of cereals, bran, dried carrots, parsley, and corn kernels. Thanks to this form of vegetables, we gain large amounts of natural vitamins, with a record shelf life - usable for consumption up to 2 years! In combination with our dried meat, it creates **a perfectly balanced meal for dogs**. The set is extremely easy to use - just pour it into a bowl and add a little water to soften the ingredients.

#### REVOLUTION IN PET FOOD

The DOGERO Premium line of sausages for dogs is a complete novelty on the wet food market. A special recipe allowed to completely eliminate gluten from the product. As much as 90% of the composition is carefully ground meat and ingredients of animal origin. The addition of cartilage and skins from chicken quarters is a source of collagen for the health and efficiency of canine joints. The use of carrot and parsley in the recipe is a natural enrichment with vitamins and minerals, including extremely valuable for eyesight and hair - carotene. Linseed supports digestive processes and provides Omega fatty acids essential in the diet. Like all Ares products, DOGERO Premium sausages are free of preservatives, GMOs, artificial colors and flavors. Their durability and safety is ensured by the sterilization process.
