

WINDOWMAKER[®]
SOFTWARE

The world's leading software for the window and door industry

www.windowmaker.com

40+ YEARS EXPERIENCE

Windowmaker is an established software company with over 40 years of experiences in the window and door industry. With over 11,000+ licences supplied worldwide, we strive to continuously innovate, deliver robust, reliable and flexible software solutions.

40+ DEVELOPERS

Our dedicated team of experts ensures we have a continuous program of development, testing and support. This enables us to respond quickly to the needs of our customers as well as changes in upcoming market trends.

75+ COUNTRIES

We have sold to over 4000 businesses within the window and door industry across the globe. Our single, highly adaptable solution is scalable to businesses - large and small.

700+ YEARS R&D

This huge effort and investment have helped us to evolve into one of the most comprehensive window and door software solutions available. Despite the wide range of features, Windowmaker remains extremely easy to use with an intuitive user interface and simplified reporting systems.

THE WINDOWMAKER PRODUCT RANGE

Power your business with Windowmaker Cloud—our Windowmaker Configurator, hosted on Microsoft Azure for reliable, high-performance access and offered through flexible, cost-effective subscriptions

SALES

Includes:

- ✓ Hundreds of Standard Designs
- ✓ Quick & Easy 1-off Designs
- ✓ Angled and Arched Shapes
- ✓ Bays / Bows / Georgian / Leaded
- ✓ Entrance Doors / Panels
- ✓ Global Changes
- ✓ Revisions
- ✓ Standard Reports/ Dashboards

ESSENTIALS

Includes:

- ✓ **All the Features of Sales**
- ✓ Purchase Order Reports
- ✓ Production Work Instructions
- ✓ Bar Optimisation
- ✓ Reusable Offcuts
- ✓ Labels
- ✓ Delivery Reports
- ✓ Installation Instructions

PROFESSIONAL

Includes:

- ✓ **All the Features of Essentials**
- ✓ Windload
- ✓ Commercial Contracts
- ✓ Optimised Costing / Pricing
- ✓ Purchase & Sub-batching
- ✓ Production Scheduling
- ✓ Remakes
- ✓ Deliveries & Scheduling
- ✓ Installation Scheduling
- ✓ CAD Link

Cloud-Based Security

Cost-Effective

Customisable Solutions

ADVANCED CONFIGURATOR

- ▶ A single software solution for all materials - PVC-U, Aluminium, Wood, Fiberglass, Steel, Composite
- ▶ Intuitive and quick - Increase efficiency and throughput
- ▶ Intelligent Order Entry to eliminate any invalid input with associated costly mistakes

The screenshot displays the software's configuration interface. On the left, there are several panels for selecting window shapes: 'Shapes' (basic window types), 'Simple Conservatories' (various conservatory styles), 'Bays & Bows' (bay and bow window styles), 'Angled' (a grid of angled window shapes), and 'Arched' (a grid of arched window shapes). On the right, there are two main panels: 'Design Library' and 'Glass Library'. The 'Design Library' panel shows a 'Customised Options list to change specification or add extras' with a table of options and their values. The 'Glass Library' panel shows 'Instant Pricing Display and Updates' with a table of glass specifications and prices.

Design Library

Options	Value
PVC Colour	Foil 25
Foil 25	Douglas Fir On White
T-Joins	Welded
Oil	<None>
Frame extension	<None>
Outer Frame	72mm

SALES

Sales - Trade

Windowmaker Dealer Client

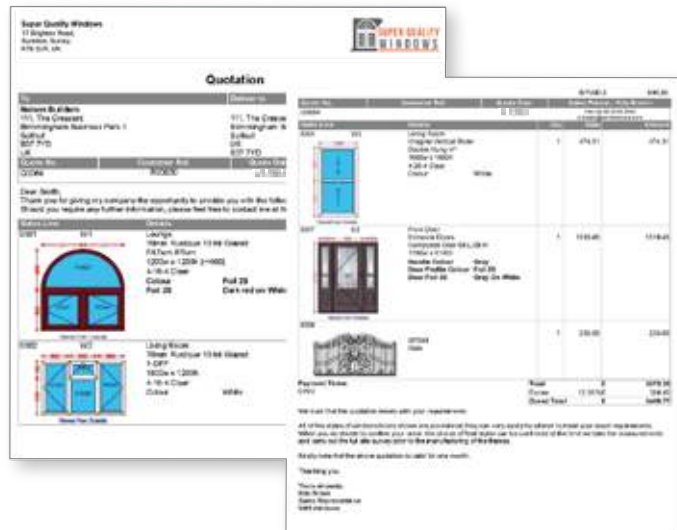

A dedicated sales solution for dealers. Provide WM Dealer Client to your network of dealers for efficient quoting, ordering and a completely integrated sales experience.

Dealer Benefits

- Fast, professional quotes
- Always up-to-date
- No paperwork
- Mobile & offline access
- Order tracking
- Fewer errors, more sales

Manufacturer Benefits

- Unified system = low effort
- No manual order entry
- Real-time dealer visibility
- Smarter pricing & planning
- No paper price lists
- Happy, easy-to-train dealers

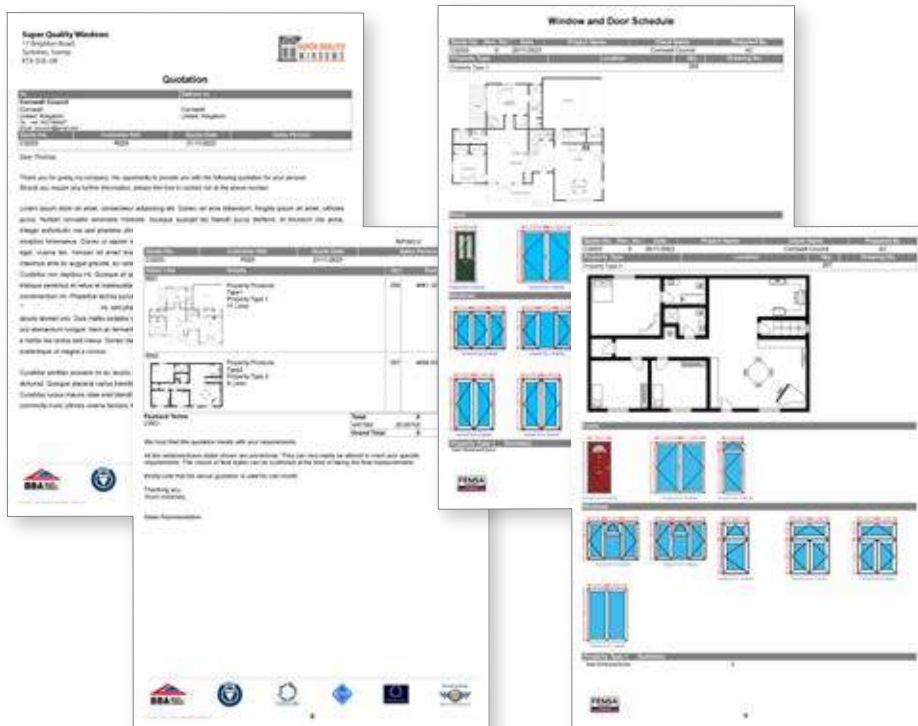

Windowmaker Options

▶ Pricing via Marked-up Cost	▶ Customer Special Terms	▶ Commercial Projects
▶ Optimised Costing	▶ Global Changes	▶ Link to CAD
▶ Pricing Extras	▶ Revisions	

Maximise profits with error-free quotations and reduced turn-around time

Sales - Commercial

Commercial Projects

Efficiently quote for new construction projects. Manage survey, purchasing, production, delivery and installation in stages within phases.

Revisions

Quickly create alternative versions of quotes, making revisions effortless and helping you close more sales.

CAD Link

Export projects into CAD allowing you to produce technical drawing quickly and easily.

CAD cross-section

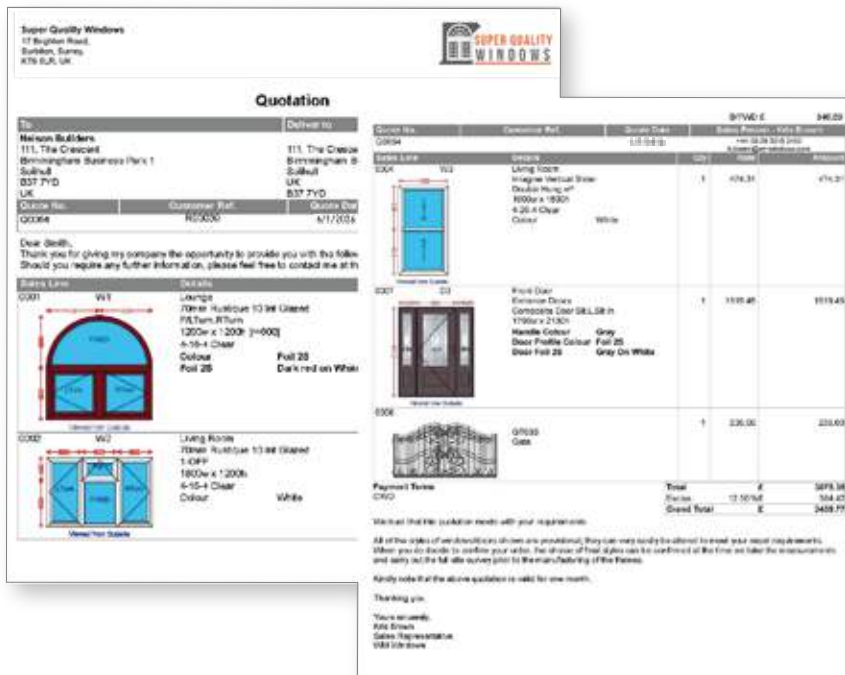

SALES

Sales - Retail

Quotation Documents

Produce professional looking quotations quickly and easily with our powerful configurator. Even managing large scale phased projects for your large commercial customers.

Design Summary

A useful view to see the contents of the order by design. Key information is displayed per design.

Photo Fronts

Windowmaker's Photo Fronts function allows users to overlay the designed window onto a house image, providing a realistic representation of how the windows will look on the exterior of a building.

WINDOWMAKER MEASURE

Overview

Windowmaker Measure, available on Android as well as iOS, is an all-in-one surveying and quoting solution for installers, surveyors and sales people. It allows them to not only record measurements but also instantly generate then e-share professional quotations and measuring reports.

Organise

Keep your projects in one place. Track all of your exported documents in your document library.

Measure

A digital survey sheet at your fingertips, with automatic frame size calculation. Simple, powerful interface for initial quoting & quick input. Link directly to your laser device & reduce human error.

Quote

High quality quotes at the press of a button. Show your customer their window with our extensive selection of product styles. Send quotes & RFQs straight from your device.

Download Today - Available on iOS and Android

OPERATIONS

Scheduling

Windowmaker Scheduling enables you to take full control over all operations - Survey, Purchase, Production, Delivery and Installation - by maintaining compatible schedules for each.

Purchasing

The Purchasing option allows you to generate and track Purchase Orders for both bought-to-order and stocked components. Send electronic purchase orders to the supplier which they can import directly into their ordering system.

Production Scheduling

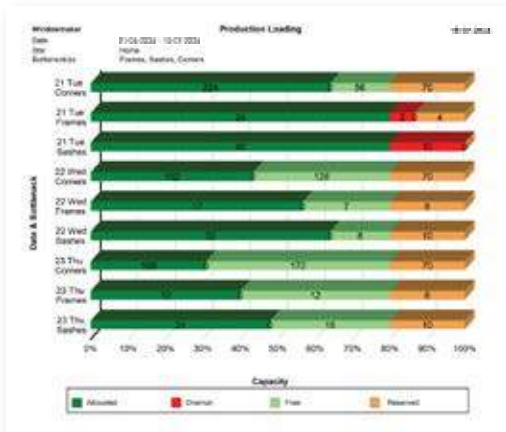

Electronic Purchase Order for Glass

Manufacturing

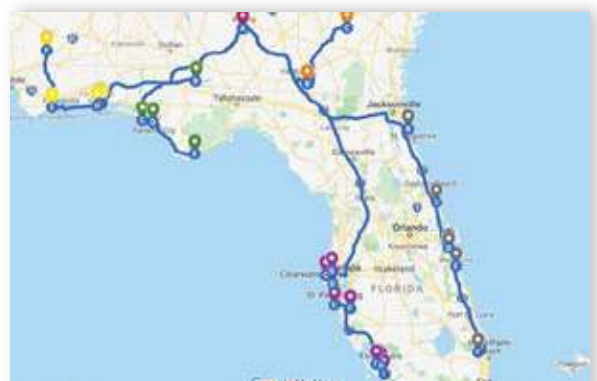

Plan your production considering: Capacity, order value, delivery dates, priority and other factors; Day-wise or week-wise production across work shifts, production lines or even across sites. Optimise the use of available resources and reduce cycle time to maximise production floor throughput. Generate station-wise work instructions (printed reports, labels or control files for the machines).

Delivery

Plan delivery for a day/shift/vehicle from a production site on a particular route for optimum uses of resources. Generate the necessary documents/checklists (e.g. Delivery Notes, Picking List, Packing Slips). Easily move goods from one delivery to another to accommodate production schedules or customer requirements.

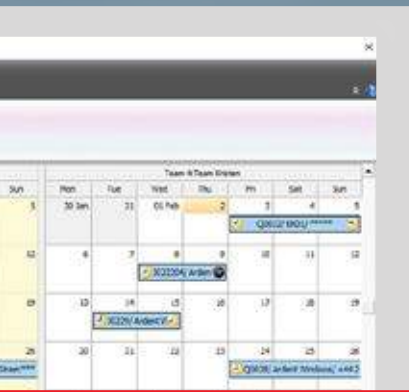

Production Loading Report to assess Capacity Utilisation

Delivery Route Optimisation

Integrated Scheduling and Management of Purchasing, Production, Delivery and Installation

Survey and Installation

Schedule a Sales Order for survey/installation by an individual or a team depending on their capacity, workload and availability. Monitor the capacity utilisation of individuals or teams. Shuffle and/or Split the allocated orders among multiple teams as required. Generate printed or electronic Survey Sheets.

Survey Schedule Board

Inventory / Stock

The Windowmaker Stock Control module enables you to know what, where and how much inventory is on-hand, ordered and allocated. This helps with all activities surrounding effective sourcing, forecasting and replenishment of the inventory. It also minimises holding, replacement and shortage costs of inventories and maximises the efficiency in production and delivery. Let Windowmaker take control of your inventory and give you peace of mind.

Tracking

Use barcode technology to keep track of products as they are manufactured and progress down the production line. The Tracking Client also provides clear and comprehensive Works Instructions including dynamically reprioritised Work-To Lists for each station operator. Labels can be printed at these screens.

On screen Works Instructions at sash assembly, Go paperless!

Offcut Label Tracking

Labels

Generate labels that can serve as work instructions at various stages of production, as well as during delivery and installation. The barcodes on the labels help identify and track the component and sub-assembly throughout the production and thereafter.
