## INOAC CleanDuct 75 / 100

PVC ducting and accessories available in 2 sizes and 5\* colours

The Inoac CleanDuct plastic trunking systems provide a professional and aesthetically pleasing solution for concealing refrigeration pipes and electrical cabling in air conditioning installations. The asymmetrical design and integrated C-profile ensure quick and secure installation, preventing pipes from shifting. Thanks to the UV-stabilised, extruded PVC, INOAC trunking is durable and resistant to higher temperatures. CleanDuct is available in two sizes (CD-75 and CD-100) and in several colours, including anthracite and black, coloured throughout the material. The CD-75 trunking is also available in a painted finish in RAL 3009\* (Scandinavian Falun red).
