

VIPIR™ CQB Synchro

- Covert, user programmable custom signatures with any near-IR light source, including sunlight.
- Master / Slave and Record settings separated from in-field functions with Reverse Polarity Program Switching®
- Included MOLLE Compatible Belt Clip
- Master / Slave Functionality allows for synchronized grouping of custom signatures for advanced C² Operations.
- One-hand operable
- Waterproof up to 100 meters
- Extreme impact-resistance

- Covert, user programmable custom signatures with any near-IR light source, including sunlight.
- Master / Slave and Record settings separated from in-field functions with Reverse Polarity Program Switching®
- Included MOLLE Compatible Belt Clip
- Master / Slave Functionality allows for synchronized grouping of custom signatures for advanced C² Operations.
- One-hand operable
- Waterproof up to 100 meters
- Extreme impact-resistance

VIPIR™ NATO Helmet Light

- Covert, user programmable custom signatures with any near-IR light source, including sunlight.
- Automated group flashing
- Included MOLLE Compatible Belt Clip
- Extreme impact-resistance
- Overt and Covert functions separated with Reverse Polarity Program Switching®
- One-hand operable
- Waterproof up to 100 meters
- Positive vibrating feedback for tactile switch position indication (Not available in the US)

VIPIR™ SWIR Helmet Light

- Features Short-wavelength Infrared (SWIR) Output
- Automated group flashing
- Included MOLLE Compatible Belt Clip
- Positive vibrating feedback for tactile switch position indication (Not available in the US)
- Overt and Covert functions separated with Reverse Polarity Program Switching®
- One-hand operable
- Waterproof up to 100 meters
- Extreme impact-resistance

VIPIR™ Quantum FX

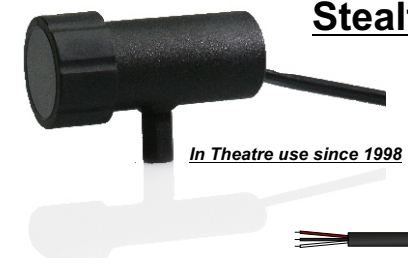

- Overt and Covert user programmable custom signatures with any near-IR light source, including sunlight.
- Adjustable intensity settings
- IR Detector included
- Included MOLLE Compatible Belt Clip
- Signature programming and intensity adjustment settings separated from in-field functions with Reverse Polarity Program Switching®
- One-hand operable
- Waterproof up to 100 meters
- Extreme impact-resistance

VIPIR™ Mockingbird®

- Covert, user programmable custom signatures with any near-IR light source, including sunlight.
- Waterproof up to 100 meters
- Included MOLLE Compatible Belt Clip
- Overt and Covert functions separated with Reverse Polarity Program Switching®
- One-hand operable
- Extreme impact-resistance

Stealth Illuminator™

- Already an installed factory kit on many new vehicles
- Can be wired for High, Low or Dual intensity IR output
- IP68 Waterproof Rating
- Extreme impact-resistance
- Applicable for a wide range of convoy vehicles
- Used on Humvees, ATVs, snowmobiles, water craft and many other types of expeditionary vehicles

Lighthouse® Vehicle Marking Kit

- Comes in kit of 10 units
- Each Unit contains distinctive IR Flash pattern for covert vehicle identification
- Waterproof up to 3.05 meters
- Extreme impact-resistance
- Hard-Wired (permanent installation) and Car-Plug (temporary installation) options available
- Ideal for easy identification from overhead assets during undercover operations

Engineering for Specific Applications

Our company has a well earned reputation of developing new technologies and product innovations. Our broad knowledge and agile manufacturing base allows us to produce at speeds and within budgets that others have difficulty approaching. We achieve many of our results because we are experts in our field and because we are adept at modifying our commercial off the shelf (COTS) products to meet the high demands of military usage.

Adventure Tactical manufactures its own products in-house and our staff has decades of combined experience. We have the expertise to bring a product from proof of concept prototype, to field tested production and finally to full manufacturing on time and within budget.

In cooperation with Program Managers, elite military units and other end users, we have produced several state of the art products that are currently in active service.

***If you don't see what you want,
chances are we already made it, or
can produce it to your requirements.
Just give us a call.***

Landing Zone Systems

***The smallest, lightest, most effective
portable airfield lighting systems.***

- Controllers and repeaters allow for maximum range and flexibility, even in less than ideal conditions where line of site may not be available
- Beacons visible from up to 30km IR, on a clear dark night
- Light Shaping Technology™ allows for both diffusion and collimation of light output depending on user needs
- Adjustable tripod mounts can attach to both beacons and repeaters
- Both Visual and covert IR functions
- Kits available for Drop Zones, Parachute Jumper Signalling, Cache, Container and Beach Head Marking and various other applications

10cm and 40-120cm
Tripod Mounts

Helicopter Landing Zones

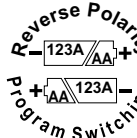

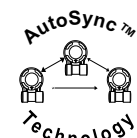

***Made specifically for helicopter landing operations.
Available for 5 Light NATO-T***

Guardian™ Signal Light

The toughest, lightest, brightest light in its class

- Ergonomic, omnidirectional design
- Runs on two Cr2032, included with all units in pre-wrapped pack
- Standard Guardians come with MOLLE compatible belt clip
- Guardian Mockingbird@s make use of our Mockingbird® Technology - allowing users to record their own unique flashing signatures
- Alternatives to the standard base include the Tag-It and the Collar Mount

Rotate Lens to Turn ON or OFF

Flip Battery to Change Functions

STEADY-ON

FLASHING

All Models available in 6 Colors & IR

Bodies available in Black, Tan or OD Green

Guardian Trident™

Implementing some of our most advanced technology in a small, compact size

- Up to 6 functions with Reverse Polarity Program Switching®
- Runs on two Cr2032, included with all units in pre-wrapped pack
- MOLLE Compatible Belt Clip included
- Multiple output colors available on a single unit
- Mockingbird® Technology for recording unique signatures available
- One hand operable
- Extreme impact and pressure resistance
- Waterproof up to 330' (100 meters)

Police Products

Our extensive line of gear for Law Enforcement

VIPIR™ Police Tactical

- User programmable custom signatures
- Four output colors: Red, White, Blue and IR
- Customizable intensity
- IR Detector and Police Strobe

VIP™ K9 Police Strobe

- Special K9 Strobe function at very low frequency
- High intensity and low intensity Police Strobe functions (Red/Blue)
- One-hand operable

Trident™ Police Strobe

- Red and Blue output colors
- One-hand operable
- Police Strobe function (Red/Blue) included

Guardian™ Crowd Control Marker Tags

- Lens color for omnidirectional Guardian units user definable with 9 colors & IR available
- Custom tags available on request
- Patch holder can be clipped onto back of hood
- Ideal for crowd control operations

The Trilobyte™

Our newest line of helmet lights

- Our new product line with the same technology as our standard line of VIP™s, in a new design developed specifically for military airborne operations
- Advanced user interface organizes a wide range of functions in an easy to navigate system
- Features 4 output colors: White, Green, Red & IR
- Safeguards to prevent accidental Overt activation
- One-hand operable
- Securely fastens to hook / loop surfaces
- Automated group flashing synchronization
- Positive vibrating feedback for tactile switch position indication (Not available in the US)
- Available in four mods of increasingly advanced technology
- Advanced mods feature user-programmable custom flashing signatures, including Master / Slave synchronizing in the most advanced model.

Product Accessories

To Complete your kit

VIP™ / VIPIR™ Light Shrouds

- Powerful tools for adapting visibility for any given situation
- Light Diffuser will maximize the VIP™'s light volume and peripheral visibility
- Light Shield will narrow the VIP™'s viewing angle to 18° (long version) or 30° (short version), allowing only directional viewing

VIP™ / VIPIR™ Universal Mount

- Can pivot VIP™ or VIPIR™ up to 180 degrees in ten 18 degree steps
- Designed for optimal stability
- Configurable arms to adapt to any environment
- Holes for attaching to surface with either rope or nails

VIP™ / VIPIR™ MOLLE Compatible Pouch

VIP™ / VIPIR™ Window Mount

Product Accessories

To Complete your kit

SHARK Helmet Mount

- Virtually unbreakable design
- Fits any VIP™ or VIPIR™
- Unique design to fit a wide range of helmet curvatures
- Rounded shape to prevent snag hazard
- Superior, universally compatible hook / loop fastener

Guardian™ / Trident™ Helmet Strap

- Hook strap easily attaches Guardian™ or Trident™ to any loop surface
- Comes with loop surface patch with strong adhesive to attach to helmet or other surfaces as needed

VIP™ / VIPIR™ Dual Battery Adapter Cap

VIP™ / VIPIR™ Trigger Cap

Lighthouse® Emergency Raft Light

Interior and Exterior emergency raft beacons

- Patented pull-pin activator that will automatically set beacon unit off when emergency raft is inflated
- Waterproof up to 10 meters
- User adjustable intensity

Guardian Trident Survival™

- Patented pull-pin activated function and manual override functions (Flashing and Steady-On)
- Patented water sensor available as alternative to pull-pin if desired
- White Output and IR Output interchangeable by switching the battery polarity
- Waterproof up to 100 meters
- Several options available for housing color, output color, activation mechanism (water sensor or pull-pin, with or without manual override, etc...) and attachment method

IMPORTANT NOTICE: All Lighthouse® Raft Lights and Guardian Trident Survival™ Lights contain user replaceable batteries. Serviceable batteries and product is consistent with our company's environmental green policy of manufacturing long service life products and not disposable lights.

Please take the reusable aspect of our lights into your environmental and overall value proposition when comparing product cost over the lifetime of your application. We believe you will find our value unsurpassed in the marketplace.
