

SportChamp SC2D

PASSION FOR SPORTS GROUNDS

Multifunctional ride-on machine for the advanced maintenance of artificial turf.

The **SportChamp**, the leading machine in the world market, is the solution for the maintenance of different synthetic sport surfaces within a sports facility. By the use of different attachments all synthetic sport surfaces can be cleaned and maintained according to the manufacturer's instructions and beyond that for an efficient and economic upkeep of the surface.

During weekly use the SportChamp levels the infill material of filled surfaces with the **rotary brush** and eliminates contamination at the same time. Thus the infill material will be loosened and the fibre will be put upright again.

Fibres lying loosely on the turf and even well-rehearsed fine dirt will be vacuumed in a large-volume **filter box** during the surface maintenance by the **proven extraction system**. The filter unit is controlled automatically and cleaned within minutes. It will be evacuated - controlled hydraulically - quite conveniently while sitting on the driver seat.

Numerous attachments facilitate and expedite the necessary maintenance tasks. The range includes attachments for the winter services and the refilling of infill material, for the removal of leaves, the loosening of extreme compaction and the spraying of care products. The application area of the SportChamp is enlarged by additional attachments for non-infilled artificial turf, synthetic sports surfaces or sidewalks.

Thereby it is the **multifunctional care and maintenance machine** for your sports facility. Beside the classic, weekly maintenance tasks the SMG SportChamp can additionally carry out the annual **basic and deep cleaning**.

SMG **dust filters** installed by SMG comply with DIN EN 60335-2-69 / dust class „M“ and EN 779 „F8“ or „F9“. Dust with a high proportion of fines as well as granulate/fibre abrasion (**microplastics**) are extracted via the **powerful turbine** and bound in the filter.

More about the
SportChamp SC2D

SportChamp SC2D

PASSION FOR SPORTS GROUNDS

**Comfort**

Suspended and adjustable driver seat.

**Pedal**

Infinitely variable hydrostatic drive.

**Display**

To control functions and service intervals.

**Coupling**

PTO to power the attachments.

**Easy handling**

Ergonomically arranged operating controls.

Item No. 8800071

Drive	3-cylinder diesel engine, water-cooled / 16,1 kW (21,9 HP)
Traction drive	hydrostatic, driving speed up to 10 km/h, hydraulic lifting device for accessory attachments and filter box, differential lock
Capacity of tank	approx. 16 litres
Brush working width	depending on brush: 900 - 1,600 mm
Weight	630 kg
Dimensions	L 2,300 x W 1,140 x H 1,540 mm

Subject to technical changes.

**Light-footed**

Tires especially for use on turf ensure minimal pressure on the ground

**Refueling**

Fuel tank neck outside for 16 liter fuel tank.
