

Monoprotein

Vet Hypoallergenic Gussto®

Monoprotein

Gussto Hypoallergenic – an easily digestible, complete and well-balanced dietary super-premium food for adult cats suffering from dermatosis and intolerance to ingredients and nutrients. Developed with Dietetics and Vets. It is also recommended for cats with sensitive gastrointestinal tract and used in exclusion diets with food allergies. The optimal level of protein with a high biological value, the source of which is only horse meat, providing a lot of linoleic fatty acid, relieves the digestive system, being a source of the right amount of energy and amino acids, and supports the maintenance of good condition. EPA + DHA and a high level of fatty acids including Omega 3 supports the functioning of the skin in the case of dermatosis and excessive hair loss.

Composition: 70% Horse, 28,5% Broth, 1% Minerals, 0,5% Fish Oil.

Analytical constituents: protein 10%, fat content 5,5%, crude ash 2,4%, crude fibre 0,2%, moisture 78%, calcium 0,22%, phosphor 0,16%, omega-3-fatty acid 1,5%, omega-6-fatty acid 1,2%, Linoleic fatty acid 1,13%, EPA+DHA 0,15%.

Balanced Calcium-/Phosphor proportion: 1.38/1

Energy value: 101,62 Kcal/100g, 425,19 kJ/100g

Additives: Nutritional additives per kg: vitamin D³ 220 IU, zinc as zincsulfate (monohydrate) 27.5 mg, manganese as manganous sulphate monohydrate 1.5 mg, copper as copper(II)sulphate pentahydrate 1 mg, iodine as calciumjodat (waterfree) 0.83 mg, taurine 2000 mg, biotin 330 µg.

Feeding guide (indications dependent on age and activity): Per 3kg bodyweight approx. 160g amount of feed per day. Please provide always fresh drinking water for your cat. Application: Dermatitis: initially up to 2 months. Hypoallergenic: 3 to 8 weeks: if signs of intolerance disappear this feed can be used initially up to one year. Veterinarian's opinion be sought before use and before extending the period of use. High level of Linoleic fatty acid and EPA+DHA.
