COMPANY OVERVIEW

PATECCO delivers comprehensive solutions based on latest technologies such as Cloud Access Control, Privileged Account Management, Managed Services, Access Governance, Identity Governance and Intelligence, Role-Based Access Control, Security Information and Event Management, Recertification and Asset Management. Its long-term partnership with enterprises like Microsoft, IBM and One Identity supports the success in a number of international consulting projects.

VISION

At PATECCO we are inspired by a single goal: to provide the security in your business and to be your trusted partner in the process of digital transformation.

Our vision is to enhance the Information Security and to facilitate Technology Innovation by:

- Ensuring effective management of complete identity lifecycle of users, devices, things and services
- Developing and implementing reliable IAM solutions according to your business needs
- Simplifying and improvement of the user experience

MISSION

Our mission is to build trust and to make the companies be successful in digital transformation by ensuring secure access and protection of data incorporating the latest technologies in the most effective and efficient manner.

- We replace old IAM paradigms through innovative models and have the practice to work with our customers beyond technology implementation.
- Our team knows how to ensure protected sensitive data, proper management of thousands of identities, improved compliance, boosted user productivity, and enhanced security.

OUR SERVICES

The efficient management of digital identities is a central element of every IT security infrastructure. PATECCO consults customers with a great competence in all matters concerning Identity Management as well as in the selection and implementation of the right software. PATECCO has a long-term experience in implementing complex Identity and Access solutions for medium and large enterprises. Organizations that partner with PATECCO benefit from its high qualified consultants and proven delivery methodology, reducing risk and optimizing results.

PATECCO offers a comprehensive service portfolio from strategic consulting to selection, implementation and adaptation of the appropriate access management solution and the creation of roles including documentation, as well as maintenance and support.

Our team evaluates technologies for your business that fit your requirements, develop individual platform and operating concepts. We have experience with a large number of target systems and design innovative and forward-looking solutions that comprehensively meet the requirements of practical feasibility, and sustainable profitability.
