

# Ocaso®

ELEVATED EVERYDAY CARRY

2025 *collection*

[ocasoknives.com](https://ocasoknives.com)

# The **STRATEGY**®

The Strategy is lightweight, durable, compact, and comfortable enough to be carried into the office or ready for off-grid adventure. Designed by custom knife maker Mike Wallace, the Strategy features a 3.5" clip point blade made from German K110 (D2) steel for outstanding edge retention and toughness. The ergonomic handle was designed for ideal comfort and grip and is made from optional high-strength G-10 milled scales, peel-ply Carbon Fiber/G-10, or 6061-T6 aluminum. The Strategy is outfitted with our signature ambidextrous fold-over deep carry clip and stainless steel caged bearings with flipper opening for incredibly smooth and rapid deployment.

**NEW**

## **TITANIUM & S35VN**

Upgrade to premium CPM S35VN steel and high-strength Titanium. S35VN is a USA made, high-end stainless steel that provides an excellent balance between toughness, corrosion resistance, and edge-retention. It is recognized as a premium steel due to its durability and remarkable wear resistance.

## AVAILABLE FINISHES

### BOHLER K110 STEEL

POCKET KNIFE *Perfection*  
The **SOLSTICE**®

## OUR BEST SELLING GENTLEMAN'S KNIFE

Designed by renowned custom knife maker Andrew Demko, the Solstice is the epitome of executive knife excellence. Our mission was to design the best gentleman's knife possible, with an eye for elegance and sophistication, and the performance to back up its good looks. Modern, discreet, lightweight, and easily carried in your front shirt or suit pocket, the Solstice was made to Demko's exacting standards and crafted from the highest quality materials.

Available in three blade styles (Straight, Harpoon, or Wharncliffe) and featuring aerospace grade titanium or optional carbon fiber handles, and premium USA made Crucible S35VN stainless steel for the ultimate edge retention and wear resistance. The Solstice includes our signature fold-over ambidextrous stainless steel deep carry pocket clip and stainless steel caged bearings with flipper opening for incredibly smooth and fast deployment. The Solstice is more than an elegant accessory, it gives you the precision to perform, and the power to impress.

Weight: 1.7 oz / 49 g (Carbon Fiber)  
2.5 oz / 71 g (Titanium)  
Blade Length: 3-1/4" / 9 cm  
Thickness: 0.125" / 3.2mm  
Overall: 7-3/8" / 20 cm

Straight / Black PVD / Carbon Fiber	\$209.99	10CFB
Straight / Satin / Carbon Fiber	\$209.99	10CFS
Straight / Satin / Titanium	\$229.99	10CTS

# NEW ANODIZED TITANIUM SOLSTICE®

Our Titanium Solstice is now available in an anodized finish that turns this already incredible knife into a work of art. Custom finished using an "entropic" anodizing style, the complex, random patterns and striking coloration evoke the look of lightning or nebulas. No two knives are alike, making them ideal for collectors or anyone who wants something truly special for their everyday carry.

**WHAT IS ENTROPIC ANODIZING?** The anodizing process combines the use of heat and ferric acid to create a swirled patterned oxide layer on the surface of titanium. The resulting finish is sometimes called "entropic anodizing" in reference to entropy, the state of randomness and disorder of matter. The oxide layer formed during the anodizing process is extremely durable and won't wear off.

Weight: 2.5 oz / 71 g  
Blade Length: 3-½" / 9 cm  
Thickness: 0.125" / 3.2mm  
Overall: 7-7/8" / 20 cm  
Lock Type: Liner Lock  
Made In: Taiwan, anodized by **Way of Knife** in Michigan

Anodized w/ Satin Finish blade \$259.99 10DBS  
Anodized w/ Black PVD blade \$269.99 10DBB

Available with Harpoon or Wharncliffe blade by request

*Please note - due to the nature of the anodizing process, each knife is unique and we cannot guarantee an exact pattern or color (color ranges from blue to purple).*

# ENGRAVED TITANIUM SOLSTICE

A knife that's designed for distinction. Our Titanium Solstice has been customized in two new laser engraved patterns: a finely detailed, traditional western scroll and a modern design highlighting the flowing contour lines of topographic maps. The intricate patterns and clean, modern design make these knives a unique addition to any collection.

NEW

## PREMIUM STEEL, PREMIUM STYLE

Engraved models are available in your choice of a black PVD-coated or satin-finished blade and feature the same premium USA CPM S35VN steel, titanium handle, stainless steel caged bearings and ambidextrous deep carry pocket clip as our original Solstice. Available with a Harpoon or Wharncliffe blade by request.

Weight: 2.5 oz / 71 g  
Blade Length: 3-1/2" / 9 cm  
Thickness: 0.125" / 3.2mm  
Overall: 7-7/8" / 20 cm  
Lock Type: Liner Lock  
Made In: Taiwan, engraved in USA

### Engraved Pattern Options:

# Something *Different* for your desk

Effortlessly open letters and packages while elevating your deskscape with a piece of functional art. The unique design of our Duo Desk Knife features two symmetrical chisel ground knives held together with neodymium magnets. Both a conversation piece and a multi-purpose tool, the knives snap together and apart with satisfying ease, and can function as a letter opener, box cutter, and even scissors. Designed in collaboration with custom knife maker Wes Crawford, each individual knife is the optimal thickness for daily desktop cutting tasks. Available in Wharncliffe or Spear Pt. blade shapes, the Duo Desk Knife includes a premium walnut and stainless steel stand to elegantly display your knives and keep them in easy reach.

## *Duo* DESK KNIFE

Weight (knives):	3.0 oz / 85 g
Weight (stand):	4.4 oz / 125 g
Blade Length:	2-¾" / 7 cm
Overall:	5-½" / 14 cm
Thickness:	0.15" / 3.8mm (each) 0.30" / 7.5mm (together)
Steel:	Japanese 420J2 Stainless Steel made in Taiwan

Wharncliffe	\$149.99	80DKW
Spear Point	\$149.99	80DKS

### HOW IT WORKS

The secret is in the magnets and the circular pivot design. To separate the knives, spin one side of the knife from the base of the handle. To reattach, align the center handle pivot and spin the handles back into alignment.

*Warning: Blades are very sharp. Always maintain awareness of the cutting edges. Exercise caution when separating, handling or using the blades. This is not a toy; keep out of reach of children. This product contains neodymium (rare earth) magnets and may affect internal medical devices (such as pacemakers). Keep away from electronic devices.*

# DAMASCUS SOLSTICE®

We've taken our premier gentleman's knife, the Solstice, to the next level, outfitting it with a frame lock, 120-layer rose patterned German Damascus steel and "Dark Matter" Fat Carbon® handle scales in Red, Blue or Bronze. The Damascus Solstice includes complementing anodized Titanium handle scales, polished hardware, stainless-steel caged bearings and our signature ambidextrous fold-over stainless steel deep carry pocket clip. Made in Maniago, Italy, in the "city of knives", where centuries of high-quality knife craftsmanship and the latest technology meet.

## MATERIALS THAT MATTER

**German Damascus:** We use genuine 120-layer stainless martensitic Damascus (comprised of N690 and Nitro-B steel). Our Damascus is produced in Germany using the traditional fire-welding process, resulting in a premium blade with high edge retention and sharpness.

**Anodized Titanium:** Considered a premium metal for a knife handle, titanium is lightweight with a high strength-to-density ratio. Our titanium is anodized in shades of blue, gray, and red to elegantly coordinate with the Fat Carbon handle scales.

**Fat Carbon:** Fat Carbon is a lightweight, durable carbon fiber composite produced in Lithuania. The "Dark Matter" color series used in the Damascus Solstice is a composite made from carbon fiber, organic pigments, and epoxy resin. It seems to change and shift in the light, making it a perfect complement to the dramatic Damascus steel blade.

Weight: 1.7 oz / 49 g  
Blade Length: 3-½" / 9 cm  
Thickness: 0.125" / 3.2mm  
Lock Type: Frame Lock, made in Italy

A	Dark Matter Red	\$399.99	10IFR
B	Dark Matter Blue	\$399.99	10IFB
C	Dark Matter Bronze	\$399.99	10IFG

# The SEATON

Bearing the namesake of its designer, the Seaton is a classic gentleman's knife updated with modern styling and materials. Featuring a sleek, elegantly contoured stainless-steel handle, a compact leaf point blade made from Japanese AUS-10A steel and a thumb stud for easy opening. In keeping with its minimalist, lightweight and classic styling, the Seaton was designed without a pocket clip. The Seaton is a timeless, classy pocket knife designed to handle smaller everyday cutting tasks, yet stylish enough for every outfit or occasion.

A	Mini / Stainless	\$79.99	42SMS
B	Large / Black PVD	\$99.99	42SLB

Weight:	2.6 oz / 75 g (Large) 1.9 oz / 55 g (Mini)
Blade Length:	2.75" (Large) 2.35" (Mini)
Overall:	6.75" (Large) 5.8" (Mini)
Lock Type:	Liner Lock, made in Taiwan

## MINI SEATON ACCESSORIES

Protect and showcase your Mini Seaton in style. Our full grain leather wallet and key slip were designed specifically for small pocket knives like the Mini Seaton, ensuring a perfect fit and elegant protection.

## EDC WALLET

Sophisticated and small, our EDC wallet was designed to hold your essential everyday carry items: 3-6 credit cards, cash, and your favorite small pocket knife and pen. Crafted from full-grain leather and featuring a wrap-around pocket which holds a small pocket knife and pen in the front and additional credit cards in the back. The lightweight, removable stainless steel diamond patterned money clip securely holds 10+ folded bills and is elegant enough to be carried on its own. This wallet pairs perfectly with small knives that measure up to 3-½" long (closed) like our Mini Seaton.

## LIFETIME WARRANTY

We stand behind our products 100%. All Ocaso® knives and accessories carry a limited lifetime warranty. We warrant that our knives are free of defects in workmanship and materials. If one of our knives ever breaks or fails because of a material or manufacturing defect, we'll repair or replace the knife. This warranty does not cover normal wear and tear, damage, breakage or failure caused by misuse, lack of normal maintenance, or disassembly.
