

HONKAJOKI®

Innovative Ingredients for Premium Pet Nutrition

New Functional Solutions
Coming in 2026

**Meatybind, Hydropro
& Lowashpro**

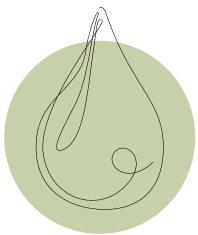

Revolutionizing Pet Food with Meatybind

Functional proteins are reshaping the pet food industry by replacing synthetic or nutritionally worthless ingredients like carrageenan. They add value far beyond thickening—they bring texture, stability, and digestibility, naturally.

- **Natural thickening & binding properties**
- **Improves texture and stability of wet foods**
- **Enhances nutritional content**

Honkajoki's functional proteins are derived from pure, traceable raw materials and meet the highest hygiene and safety standards—perfect for brands focused on health-conscious pet owners.

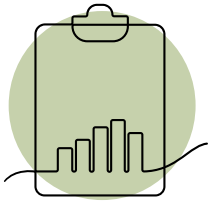

A Natural Step Ahead with Hydropro

Our enzymatically hydrolyzed poultry proteins are broken down into highly digestible peptides and amino acids, delivering targeted nutrition and superior absorption.

- **High bioavailability**
- **Gentle on sensitive stomachs**
- **Rich, natural umami flavor boosts palatability**
- **Ideal for hypoallergenic and life-stage diets**

Whether you're formulating for cats, seniors, puppies, or pets with sensitivities, our hydrolysates offer a clean-label solution without compromising performance.

Precision Nutrition with Lowashpro

Our Lowashpro protein ingredient is engineered for formulations requiring minimal ash content without compromising on nutrition or palatability. It's the ideal choice for brands aiming to optimize mineral balance and enhance digestibility.

- **Ultra-low ash content**
- **Clean, stable protein source**
- **Ideal for high-protein and low-mineral diets**

Naturally Clean

Honkajoki operates in Finland, one of the world's most tightly regulated and cleanest agricultural regions.

- **Antibiotic-free broiler production**
- **Exceptional microbiological safety**
- **EU-recognized *Salmonella*-free status**
- **Sourced from low-disease livestock areas**

All raw materials are 100% from Finland, traceable, processed under Category 3 regulations, and tested for *Salmonella*, *Clostridium*, and Enterobacteriaceae.

Transparent Sustainability

We report the carbon footprint of every product, verified by **Reforest Finland Oy**. Our closed-loop process minimizes waste and maximizes value.

Product Carbon Footprints (AVERAGE CO₂E / TON)

Poultry protein meal	447.9 kg
Porcine protein meal	538.3 kg
Feather meal	689.5 kg
Poultry fat	258.7 kg

Continuous Development to Earn Your Trust

We are committed to continuous improvement in our products and processes. A recent lean-driven project significantly enhanced the quality and consistency of our poultry protein products. Through close collaboration and high standards, we ensure consistent quality.

Our mission remains firm: to be the safest and most reliable value provider in the food chain.

Current Product Portfolio

All products are Category 3 & proteins are microbiologically tested.

Poultry protein meal ~67% protein

Palatable and safe for pets, fish, and swine.

Feather meal ~87% protein

Physically hydrolyzed for digestibility.

Porcine protein meal ~50% protein

Highly palatable and clean.

Poultry fat

Energy-rich and digestible. Excellent performance in pet food concerning palatability.

Nutrient Content

	Poultry Protein Meal	Feather Meal	Porcine Protein Meal
Crude Protein	67%	87%	50%
Crude Fat	12%	5%	15%
Ash	16%	1%	25%
Moisture	<6%	<7%	<6%
Pepsin Digestibility	~90%	>80%	~90%
Phosphorus (P)	2.8 g	0.17 g	4.2 g
Potassium (K)	0.9 g	0.13 g	0.58 g
Calcium (Ca)	4.6 g	0.15 g	5 g
Copper (Cu)	0.8 mg	0.51 mg	0.81 mg
Magnesium (Mg)	0.2 g	0.03 g	0.21 g
Manganese (Mn)	1.8 mg	1.1 mg	1.2 mg
Sodium (Na)	0.5 g	0.1 g	0.50 g
Iron (Fe)	15.3 mg	20 mg	47 mg
Zinc (Zn)	10.7 mg	12 mg	12 mg

Mineral values are mentioned per 100 g.

Nordic Safety, Sustainability, and Purity
