# Security for Digital Assets

With Swiss precision and innovation, we strengthen your cyber resilience

With the growing number of cyber threats, secure interactions and privacy are top priorities. Without cybersecurity, secure digital communication is no longer possible.

As Swiss Post Cybersecurity, we offer companies and public authorities comprehensive security solutions to better protect confidential information and meet ever-increasing security requirements.

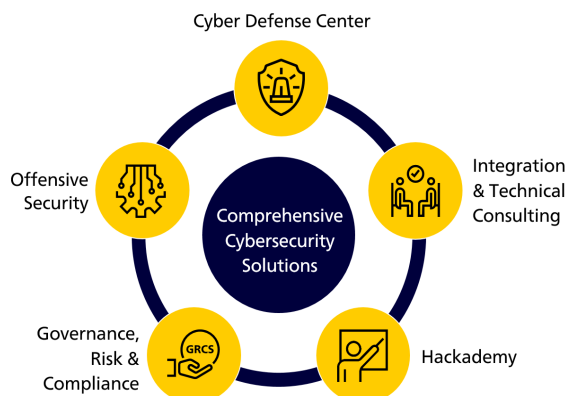

We support more than 350 organizations in Switzerland and Europe and hold around 130 security certifications. We have long-term partnerships with more than 30 manufacturers.

## Swiss Post Cybersecurity at a glance

- Swiss company formed by the merger of terreActive and Hacknowledge
- Experience: Cyber Defense since 1996 with 7x24 SOC incl. our own CSIRT
- Strong support: Standalone subsidiary of Swiss Post
- Employees: 150
- Headquarters: Aarau
- Further offices: Zürich, Morges, Luxembourg

## Your Benefits

- **Confidentiality and Integrity:** We protect your sensitive data from unauthorized access.
- **Smooth Operation:** We prevent system downtimes so your data and applications are always available.
- **Compliance:** We ensure that you comply with all legal regulations and are prepared for audits at all the times.
- **Swiss Made:** A Swiss company with a Cyber Defense Center in Switzerland.

**Monitor. Detect. React. Our services protect your company.**

**Clear focus:** 2/3 of our business activities are focused on Cyber Defense.

**Tried and tested:** With almost 30 years of experience in security, our flexible concepts are designed to be easily integrated and efficiently operated.

**Relief:** We provide targeted services to complement your organization and relieve your resources.

**Close to you:** With 365 days of full-time service in Switzerland, we guarantee a quick response to alarms.
