

# NEVER TOO SMALL

Creative, compact and joyful ways to design and live.

Ambiguous Furniture - Jaime Hayon - Design is Dead. Long Live Design - Campeggi  
The Very Unofficial and Definitely Not Definitive Principles of Timeless Design

**GAGEENANG  
JHANYAR**

The design output from Watcharavit Chanyakul and Siriwan Wattanajindawong - the team behind JHANYAR - is centered on harnessing the creativity born from the "Thai way of problem-solving". Their GaGeeNang project was born out of the pair's love of street food and the ubiquitous colourful plastic chairs and folding metal tables that accompany typical dining experiences. The GaGeeNang range seeks to address the usability issues of traditional street stall furniture - for both stall holders and diners - with designs such as their GaGeeNang Chair and a clever clip-on condiment holder.

**SWIVEL MECHANISMS  
HYNGE**

Is that a midcentury sideboard or a desk? With the Hynge 'slide and swivel', it's both. Founder Benjamin Richard Halde has designed a range of unique mechanisms to add space-saving multifunctionality to a range of existing furniture pieces. From doubling your kitchen bench space without taking up any additional floorspace, to hidden desks-cum-dining tables in your living room, these clever gadgets can do it all and more.
