Automatic bagging machine Speedpack Hybrid

Automated and flexible

Easy handling

SPH400 and SPH550

Semi-automatic or fully automatic packaging machine to produce, fill and close bags in only one working cycle. Suitable for tubular film and reel bags. Can be used to pack small items such as screws, armatures etc.

Benefit: Thanks to use of low priced tubular film or bag on a roll, the produced package has a favourable price. The bag length is chosen at the control panel, the next bag will have the new length.

Quality features

- Semi- or fully automatic operation
- Impulse sealing
- Easy operation, no tools required for change of change parts
- High flexibility despite elevated level of automation
- Available in stainless steel design
- Bag width of up to 400mm (SPH400) or up to 550mm (SPH550)

Technical Data

Sealing	1,5 x 400mm or 550mm
Sealing system	Impulse heated or permanently heated
Output	up to 30 packs per minute depending on the configuration stage of the machine
Bag width	maximum 550mm
Bag length	50 up to 600mm

All data are approximate only.

Filling and sealing machine Speedpack Tabletop
Filling and sealing in one cycle

Easy change of film reel

SPHTT

With this compact unit bags are formed, filled and closed in one working cycle – in a semi-automatic or automatic way. The machine can be used for consignment of small items, such as bulk material, casting, spare parts, etc.

Benefit: Using the Speedpack 300 Tabletop you achieve a high output in packing your products and sealing bags on reel.

Quality features

- **Semi-automatic or full-automatic tabletop unit**
- **Impulse sealing**
- **Touch screen**
- **No compressed air required**
- **Film reel can easily be changed on the front side**
- **Large variety of products**

Technical Data

Sealing	**1,5 x 300mm**
Sealing system	**Impulse sealing**
Output	**up to 20 bags per minute**
Bag width	**50 up to 300mm**
Bag length	**75 up to 500mm**

All data are approximate only.
