

Slings

The right sling offers optimal support for various conditions or disabilities.

Handi-Move has a complete range of slings for every need. The fabrics are comfortable, skin-friendly and very durable. They have a high-quality finish and offer perfect support. Sizes from XS to XXL.

Most Handi-Move lifts can also be used with the Handi-Move Body Support or Pool lift chair.

Made to measure slings

Handi-Move also offers made to measure slings.

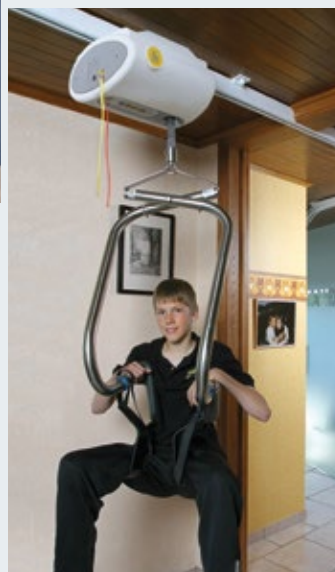

A complete list of slings on our website

Ceiling lift system

Transfers without being hindered by floor landings, cupboards, carpets and other obstacles: the Handi-Move ceiling lift is the right solution for you. Transfer smoothly and safely from room to room. We offer a system of straight rails, curves, swivel and turn points or traverse rails.

Continuous movement without obstacles

- Can be used with Handi-Move Body Support® or slings
- Independent lifting and mobility with the Handi-Move Body Support®
- The fastest ceiling lift
- Motor and rails enable transfers to any location
- Infrared remote control available on request
- All devices are certified in accordance with the Medical Devices Act
- Emergency stop and emergency down switches accessible from the floor

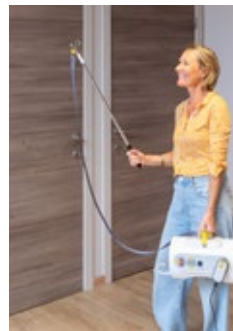

The portable ceiling lift

The Handi-Move portable ceiling lift is a practical and flexible solution for transfers or lifting people at various locations in a home or facility.

Can be used anywhere with ease

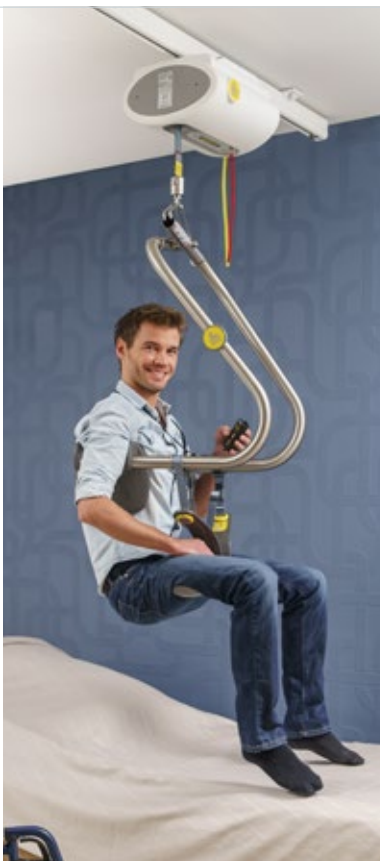

- Compact, lightweight (8 kg), yet powerful: lifts up to 182 kg
- Cost-effective: 1 lift can be used with several rail systems, even on different floors
- Aesthetic: Does not remain in sight, easy to transport and store
- Easy to hook and unhook with a reacher handle
- Remote hand control or control on the device

The Handi-Move Body Support

The patented Handi-Move Body Support® lifts and transfers people with disabilities quickly and safely. It is used, for example, to transfer from the bed – or floor – to the wheelchair or from the wheelchair to the bathroom, toilet, bath, etc.

The Handi-Move Body Support® is ideal for the toilet use thanks to its design: the seat and lower back area remain free for easy undressing and dressing.

“Two hands that support you”

The Handi-Move Body Support® is used, for example, for people with multiple sclerosis, quadriplegia, monoplegia, paraplegia, spasticity, muscular dystrophy, hemiplegia or multiple disabilities.

Independent use for more autonomy

If a user still has sufficient ability in their arms and hands, a ceiling track system with a ceiling lift enables completely independent transfers from the wheelchair to the bed, toilet or another room.

HANDI-MOVE

Mobile patient lifts

The mobile Handi-Move lifters in the 16** series provide you with several day-to-day solutions that offer particularly valuable assistance thanks to their flexibility. Sturdy, space-saving, quick and easy to use. Ideal for both home use and intensive use in a professional environment.

Large lifting range from the floor to a high bed or treatment table. Lifting capacity up to 200 kg depending on model.

These lifts are compact and easy to maneuver - even in tight spaces. They can be stowed away to save space.

HANDI-MOVE

Mobil lift „Victor“

For intensive use in care facilities. Lifting from the floor up to a high bed or treatment table is no problem.

The electric chassis spreader ensures optimum maneuverability with full tilt safety.

Fast, powerful, easy to use, versatile, and durable

- Fastest lift on the market, sturdy construction, made of stainless steel and aluminum
- Extra high lifting capacity: up to 225 kg, with a lifting range of up to 1 meter
- Up to 160 lifts are possible with one battery charge
- Can be used with the Handi-Move Body Support®, classic Handi-Move Spreader-bars as well as with the Tilting Spreaderbar

HANDI-MOVE

Stand-Assist / Activ hoist

The Handi-Move Stand-Assist is for users who need help getting to an upright position.

No or very little pressure under the armpits

- More natural stand-up movement (patented combined movement of lifting arm and user handle)
- Ideal for going to the toilet. Lifting capacity up to 180 kg
- Compact and maneuverable in confined spaces. Hands and arms remain in a natural position next to the body at a safe distance of doorframes, ...
- Stable upright position, even for tall people

HANDI-MOVE

Wall lift

The wall lift is ideal for small rooms or sloping ceilings. As the lift is portable, a single wall lift can be used in various rooms where wall plates are provided. It offers a cost-effective solution and is easy to install without the need for modifications.

Space-saving wall-mounted lifting

- Sturdy mounting on a wall or free-standing post
- Extendable boom arm and 180° swivel range for great freedom of movement, especially with the optional extension

- Cost-effective: use in multiple rooms with additional wall plates

HANDI-MOVE

Shower-bathing trolley

With the mobile shower and bath trolley, Handi-Move offers a convincing solution for all situations in which people (especially coma patients) need to be gently cared for, examined and transported.

3-in-1 system: shower, bath, and treatment

- Electrically adjustable working height and bath depth
- Mobile thanks to smooth-running castors
- Optimum comfort, easy to maintain without creases or sharp angles
- Maximum load capacity: 200 kg

HANDI-MOVE

Mobile pool lift

Easy access to the swimming pool or therapeutic pool. Meet the requirement for accessibility. Securely anchored via a floor socket, can be used in multiple basins. Indoors or outdoors.

Move directly from your wheelchair to the pool

- Smooth-running castors for effortless maneuvering and storage
- Raises and lowers itself into the floor socket without effort
- Boom arm swivels 360°, lifts up to 135 kg
- Easy to fold and stow away
