CleanCut Linerless

BIZERBA

CleanCut® Linerless revolutionizes product labeling: Increase your labeling efficiency, enhance your product's brand perception and protect the environment at the same time.

More information
High performance
with a wide range of
solutions and options.

Product description

CleanCut® Linerless is the optimal solution for all labeling needs. Whether as a wrap-around label (full-wrap), multi-side label (C-wrap) or for classic labeling of individual packaging sides: You achieve best possible results.

Select the label material which matches your needs: The basis is a high-quality paper or film material which is provided with adhesive and silicone strips individually adapted to the packaging. This allows maximum label adhesion despite reduced adhesive application. At the same time, this technology supports the exact positioning of the label on different packaging shapes, even under difficult production conditions.

Benefit from our special coating technology which means that our CleanCut® Linerless is provided with adhesive-free gaps. The applicator cuts the labels precisely through these gaps allowing the blade to remain free from adhesive residue. This has been proven to reduce downtime for cleaning and maintenance while increasing your efficiency and production reliability.

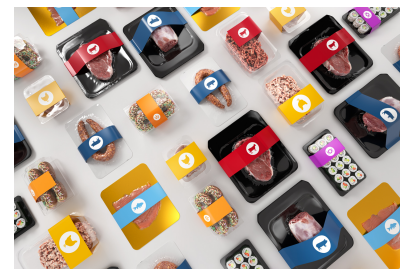

Also use every millimeter of a roll with CleanCut® linerless. These innovative labels have a perfect adhesive layer, from start to finish. In this way, the linerless rolls can be used up to the core allowing the machine to work continuously without intermediate stops.

Thanks to the integrated silicone coating, CleanCut® Linerless requires no liner at all. Consequently, a roll has up to 90% more labels. This reduces downtime due to fewer roll changes and saves transport and storage capacity. At the same time you reduce waste and thus significantly increase your ecological balance.

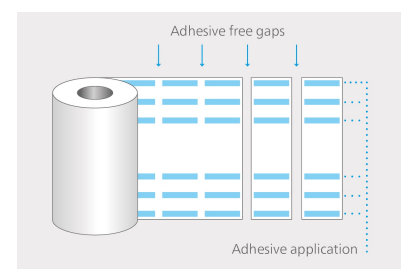

For a flawless result, we recommend the intelligent labeling system GLM-levo CleanCut. This solution is optimally matched to CleanCut® Linerless and offers you the best performance. CleanCut® Linerless is of course also suitable for all other common linerless label systems.

CleanCut linerless

Overview packages

Structure CleanCut Linerless

Highlights

- Individual properties:
 - Various facestocks and adhesives
 - Need-based adhesive coating:
- No soiling of the label applicator thanks to cutting through non-adhesive zones
- Variable thermal transfer imprint possible
- Avoiding waste: No liner
- Efficient alternative to cardboard banderoles

Options

- Reverse side printing for additional information
- Plug-In® code for inline label check
- Adhesive coating with continuous adhesive strip

My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
