QUALITY AND SUSTAINABILITY

Committed to the international standards

The high quality of our products and services is one of our most important promises to our customers.

We are well aware that we are entrusted with important professional activities, therefore we follow the latest security and quality guidelines and constantly improve our processes.

ISO 9001:2015 | ISO 14001 | DPG (Deutsche Pfandsystem GmbH) | BRC Global standard for Packaging materials (Exclusions from scope: Production of labels, wrapping labels and sleeves) | EcoVadis CSR | FSC |

Sustainable and biodegradable packaging

The need for packaging in all areas is increasing, and with it the amount of packaging waste and with it the negative impact on the environment. Sustainable forms of flexible packaging are increasingly in demand by consumers, and its use is also encouraged by food manufacturers and large retail chains.

Therefore, our experts are developing environmentally friendly, sustainable, recyclable, reusable packaging or compostable packaging, following the trends and draft guidelines of the CEFLEX Circular Economy Association.

- However, it must:
- be suitable for food contact;
 - maintain the freshness, appearance, aroma and taste of the finished products until the end of the shelf life;
 - meet demanding safety standards and quality and
 - be affordable.

FLEXIBLE PACKAGING FILMS

Packaging flexible films offer a great variety of packaging options and a high level of product protection. They also contribute to more sustainable packaging alternatives with low weight and eco-friendly material options.

BAGS AND POUCHES

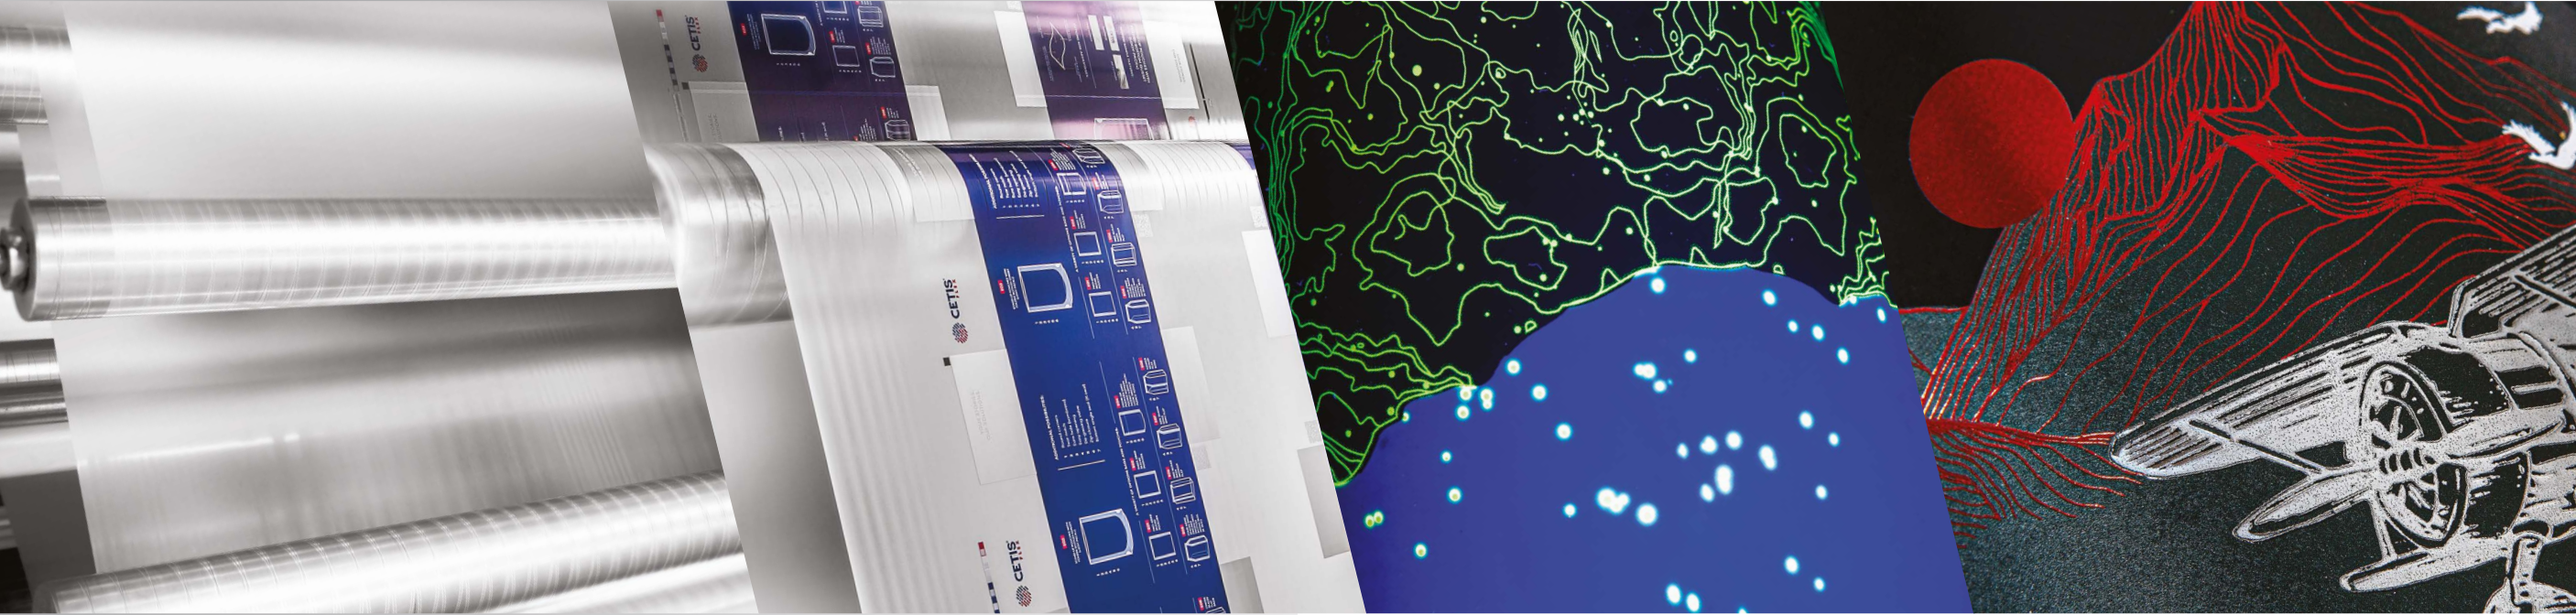

More and more products are on the shelves instead of in glass or metal packaging in bags or flexible packaging. Flexible packaging is packaging with a shape that is not rigid and which can easily be changed when refilled and during use.

SLEEVES / BRAND PROTECTION

Grab maximum attention with top to bottom product decoration. / The main purpose of applying security features on printing products is to protect the product and to ensure end users acquire a genuine product.

LABELS / WRAPAROUND LABELS

Choose among a variety of self-adhesive and non self-adhesive labels on foil or paper to tell the story of your product. / Trendy wraparound labels offer a variety of creative, technical and interactive options that successfully attract the attention of end-consumers.
