CONVINCING CORROSION PROTECTION

CONVINCING CORROSION
PROTECTION

i Corpac is a company that is successfully active in the field of research, production and distribution of corrosion protection solutions.

We offer our customers everything from a single source: a high-quality product range combined with expert, sustainable, cost-efficient and individual advice.

OUR STANDARDS – YOUR ADVANTAGES

- COEX technology: VCI films with 3 layers or 5 layers
- Largest VCI film manufacturer in Europe
- A VCI production facility in Germany with consistent quality
- Own research and development department
- Own laboratory extruder and quality control
- Own logistics, own vehicle fleet
- Customized solutions
- Technical support by specialist staff
- 7 locations

INNOVATIVE SOLUTIONS THROUGH WELL-FOUNDED ADVICE

- Experts with specialist training in the field of corrosion protection
- A team of fixed contacts: Technical sales – field service – office service
- On-site training / consulting
- Organization of innovation events
- Development of packaging concepts
- Advice and support in the event of damage
- Support with transportation tests
- Performance of climate chamber tests

A PIONEER IN SUSTAINABILITY

CORPAC GREEN LIFE

- Reduction of the film thickness
- Use of recycled material

CORPAC RELEASE

- Sustainable and closed-loop concept

WINNER CATEGORY SUSTAINABILITY

By reducing the thickness of our Corpalin® VCI films by more than a third, the CO2 footprint of Daimler Truck AG has been further reduced.

CORROSION PROTECTION DURING STORAGE AND TRANSPORTATION –

THE PERFECT SOLUTION FOR ANY APPLICATION

Temporary corrosion protection describes measures that are taken to protect metal surfaces from corrosion during transportation, storage and processing as well as during machine downtimes. Our product range offers you the right solution for every application.

VCI-VERPACKUNG

- Corpalin® VCI film
- Cor-Paper® VCI paper
- Cor-Mitter® VCI emitter
- Cor-Foam® VCI foam
- Cor-Board® VCI twin-wall sheet
- Cor-Oil® VCI oil

TROCKENMITTEL

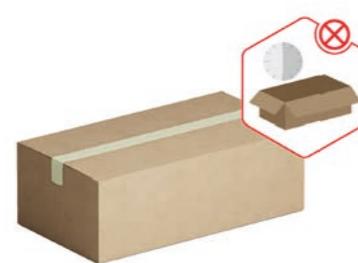

- Cor-Dry® desiccant bag
- Cor-Dry® Gel for containers

THE CORRECT HANDLING OF VCI PACKAGING

Always wear gloves! Do not touch metal with bare hands.

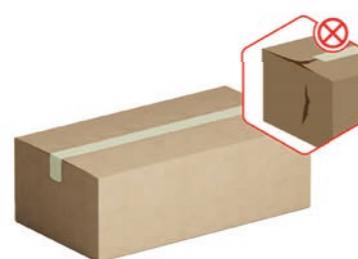

Never leave VCI packaging open for a long period of time.

Parts must be dry, clean and free of grease when packing.

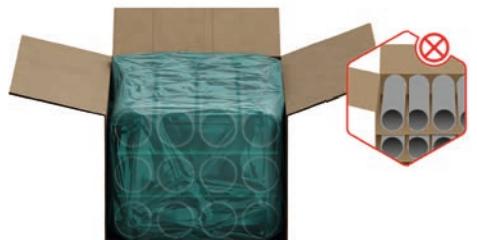

When packing, the temperature of the packaged goods must be the same as the ambient temperature!

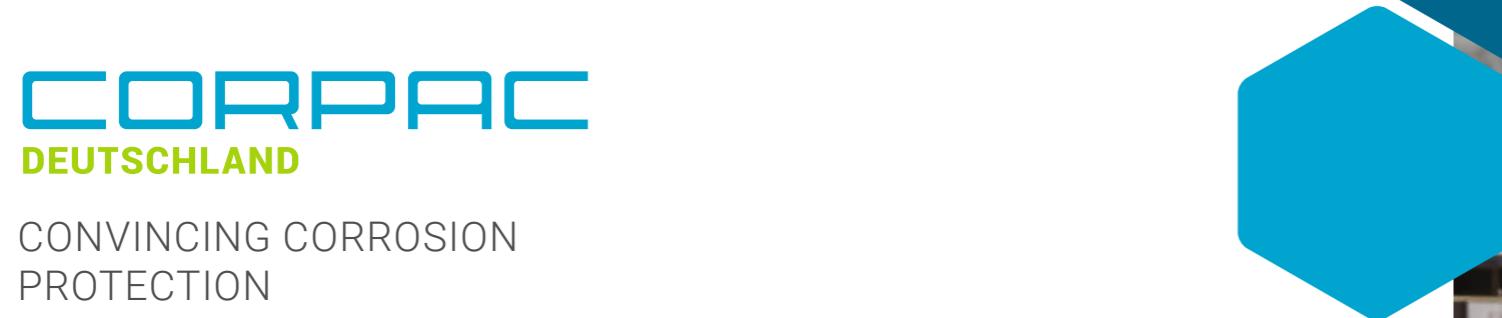

The packaging must be closed and tight! Seal holes and other damage with adhesive tape! Avoid access of bare water.

For high bulk densities, also apply VCI in the center!

Avoid direct contact between metal and wood, paper or cardboard! Also cover the clipboard with VCI!

THE CORPAC TEAM: YOUR CORROSION PROTECTION EXPERTS

Do you have questions about corrosion protection during the storage and transportation of your products? We will be happy to help you. Our employees will provide you with important information and will also be happy to advise you on site.
