

## A New Standard in Tracked Zero-Turn Mowing

**Altoz, Inc.** is an outdoor power equipment company built by an experienced team of engineering specialists, turf-industry professionals and powersports industry leaders who are inspired by a passion for excellence. **Altoz**, the first manufacturer to introduce a tracked zero-turn mower, announces the newest addition to its innovative lineup: the **TFX 766 i**.

The **TFX 766 i** is built for operators who need a purpose-built, high-performance machine to tackle places others can't go. The compact body style enables the mower to get closer to and underneath obstacles. With its compact body style, hi-vis color, and rugged design, the **TFX** is made for solar fields, retention ponds, and all municipal and utility sites where performance and safety matter most.

The new industry-first ultra-rugged **Tri-Axis™** front suspension delivers a smooth ride and exceptional operator comfort. It features an adjustable coil spring over oil shock and three independent pivot points on each side, allowing the front wheels to float while maintaining stability on uneven terrain. All-Terrain **TerraFlex®** tracks and torsion axle rear suspension provide maximum traction and stability with minimal ground compaction and turf damage.

The **TFX 766 i** is designed especially for the most demanding conditions. It's powered by a robust 38.5 hp **Kawasaki® FX EFI** engine, with 999 cc of displacement. **Kawasaki's** EFI fuel management system and electronic governor continually adjust power to load, temperature, and altitude to maintain consistent RPMs, getting more done in less time with maximum fuel economy.

Additional features include:

- 168cm All-Terrain cutting deck with swing blades; optional deck wing extension expands cutting width to 208cm.
- 53L fuel capacity for extended run times.
- 12-way adjustable high-back seat for operator comfort.
- Flat-free tires for worry-free operation.

The **TFX 766 i** will be showcased at the international Galabau trade show : stand no. 9-301.
