

Pet owners love to spoil their pets. Let the Fatory help you expand your product line with delicious pet treats and sustainable omega-3 petfood toppers your customers' pets will love. From sheep fat treats to omega source to shelf food toppers and custom formulations, the Fatory is your source for fill and finish production from concept to delivery.

Omega Food Toppers

Pet owners wanting to add a healthy boost and flavor punch to their pet's food are turning to liquid food toppers. Choose from omega-3 rich fish, krill, algal, and flax oils, including salmon oil toppers to expand your pet products line. Support skin, coat, and joint health with a borage booster. Or step outside the omega family with a flavorful sheep oil topper. With these sustainably sourced omega oils, your brand can offer seed or sea to shelf quality control.

Sheep Fat Treats

Quality and natural ingredients matter to pet owners. The Fatory offers 100% natural dog and cat treats, produced without the use of harsh chemicals, artificial flavors, or artificial coloring. Based on liquid sheep fat, these chewy treats are produced with natural flavors, in a GMP certified facility. Ask our team how we can customize treat shape, size, and flavor to meet your needs.

Custom Formulations

From condition-specific formulas to custom flavoring options, The Fatory's new product development team builds unique products that stand out on the shelf. Whether your next product is supporting joint health, promoting a shiny coat, or addressing dietary sensitivities, we work with your team to tailor formulations to meet exact needs.

Private Label Made Easy

The Factory provides one of the largest private label production lines in Europe. From concept to delivery, we work for you to develop and produce products your customers' pets will crave.

Formulation Support

Successful pet products start with a purpose. The Factory's product development team works with you to craft product formulations that meet your brand's unique needs. With expertise in pet nutrition, omega oils, nutraceuticals, specialty ingredients, and flavoring, we provide innovative formulations to grow your pet product line.

Ingredient Sourcing

As a member of the Bioriginal Group of Companies, the Factory has global access to seed and sea to shelf controlled, sustainably sourced ingredients. Raise your brand above the rest with access to renewable algal oils, sustainably sourced fish oils, natural sheep fat oil, family farmed flax or borage oils, and more!

Packaging Sourcing

Avoid the day to day grind of inventory management, juggling supplier evaluations, and mixing and matching packages with labels, pallet sizes, and shipping requirements. The Factory makes private label production easy with a selection of bottling and box options, ready for production to save you and your team time and effort in the package sourcing process.

Fill & Finish

As a leading pet nutrition fill and finish company in Europe, The Factory offers turnkey production services from source to shelf. Our state-of-the-art facilities offer precise filling to maintain product integrity, accommodating your sachet, bottling, boxing, and custom labelling needs. Trust The Factory for your turnkey production solutions.
