

CANOPHERA

**BECAUSE
EVERY DOG
HAS ...**

**THE
NATURAL
DESIRE
TO CHEW.**

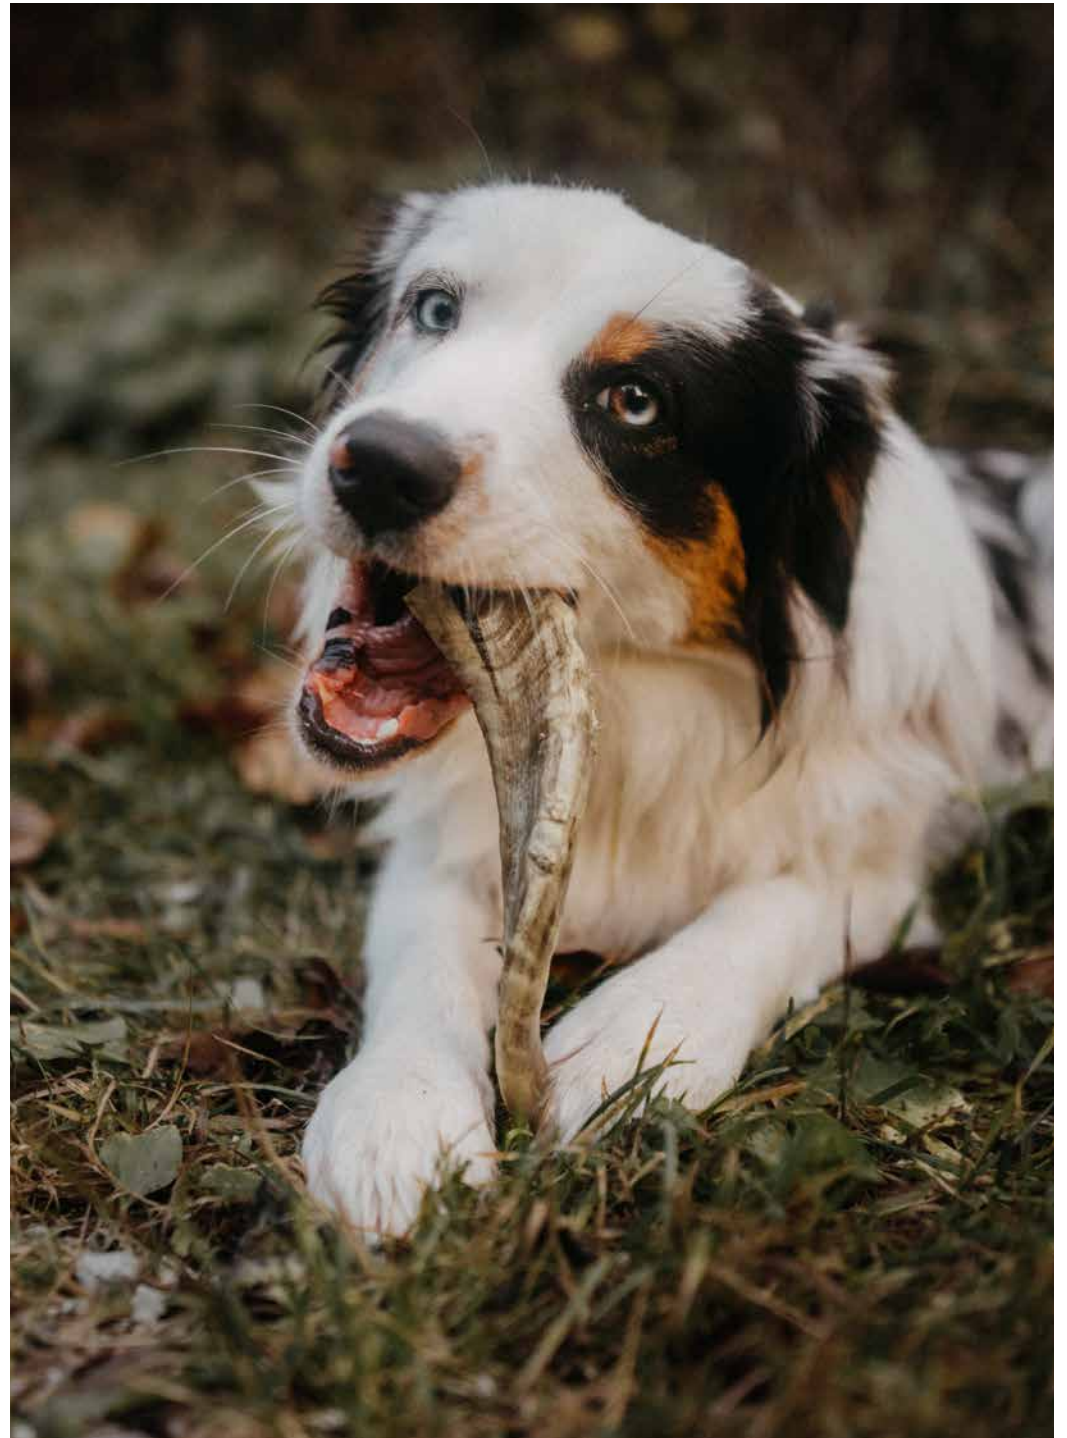

THE KEY TO LOWER STRESS LEVELS AND INCREASED FUN.

You will notice chewing behavior when dogs are puppies: they grab shoes, chew on socks, or gnaw on furniture. No wonder! Chewing is a natural way for dogs to relieve stress. While chewing, hormones like dopamine and serotonin are released in a dog's brain. These two neurotransmitters work to relieve stress. That means chewing is an easy and natural way for dogs to regulate agitation and stress independently. To help our four-legged friends (and save our belongings), natural chews come in handy.

In this fast-paced world, change is all round us and our lives are more hectic. And not just for us – the lives of our four-legged companions have changed as well. Not long ago, it was our dog's duty to accompany us while hunting or to guard our property. Now though, dogs share our busy everyday lives in crowded towns.

TO SATISFY OUR DOG'S NEEDS.

Most of us no longer live in the countryside, where our dogs can perform the duties for which they were naturally bred. So, we have to find ways to help our companions – who can easily get overstimulated and underchallenged in our busy cities and towns – live their best lives in modern times. It is our mission to provide our loyal companions with products that bring calm and pleasure back into their everyday lives, while meeting their natural desire to chew. That is why we created natural chews.

A photograph of two men in a workshop or office environment. The man on the left has a beard and is wearing a tan sweatshirt, holding a long, light-colored wooden chew. The man on the right is wearing a white hoodie. They are standing behind a dark table with various items on it, including papers, pens, glasses of water, and more wooden chews. In the background, there are large windows and stacks of cardboard boxes labeled 'CANOPY'.

**WE ARE THE INVENTORS OF
THE COFFEE WOOD CHEW
AND THE WORLD'S LEADING
PRODUCER OF NATURAL
DOG CHEWS MADE FROM
SUSTAINABLE RESOURCES.**

OUR SUCCESS STORY.

We have a deep love for dogs, which drove us to understand their behavior and look for ways to satisfy their basic needs. This led to the establishment of CANOPHERA.

What started as a small-scale company in 2012, soon developed into Europe's leading producer and distributor of natural dog chews.

2012 **20**
FOUNDED **COUNTRIES**

100+ **4 MIO+**
COLLEAGUES **CHEWS**
WORLDWIDE **PRODUCED**

2012

LOADED.

2019
COFFEE CHEW PRODUCTION
EXPANDED TO SECOND FACILITY.

2021
CANOPHERA LLC
FOUNDED IN USA.

OUR PRODUCTION FACILITY TEAM FOR COFFEE WOOD CHEWS.

PREMIUM QUALITY.

To ensure every single coffee wood chew meets our high quality standards, we built our own production facilities in Vietnam. Together with local workers, we manufacture right beside the actual coffee plantations. For all other chews, we work closely and sustainably together with some of the most experienced family businesses.

This way, we can directly access the raw material and easily increase our production at any time.

Treat everyone as you want to be treated – that is a value we live by. We feel responsible for every single person that works with us, so we ensure safe working conditions following international certifications like SA800, as well as above-average payment. We love to grow together, and we make sure that the high-quality standards that are met daily are rewarded.

SUSTAINABLE, AWARD-WINNING DOG CHEWS. THE NATURAL DESIRE TO CHEW.
